

SAP Data Warehouse Cloud Supplemental Terms and Conditions

This Supplement is part of an Agreement for SAP Cloud Services between SAP and Customer and applies only to SAP Data Warehouse Cloud (the "Cloud Service"). Any documents referenced in this Supplement are available upon request.

1. DEFINITIONS

- 1.1 "Contract Month"** means a period starting on the day in a calendar month that is the same numerically corresponding day as the Agreement effective date, and ending on the numerically corresponding day in the next calendar month, except that if there is no numerically corresponding day in the calendar month in which that period is to end, that period shall end on the last day in that calendar month.
- 1.2 "Capacity Services"** means the individual services comprising the Cloud Service identified in Attachment A to the Supplement, as may be updated by SAP from time-to-time with additional Capacity Services.
- 1.3 "Capacity Units"** means units of consumption that are consumed by the use of any of the Capacity Services.
- 1.4 "Capacity Units of Measure"** are the types of metrics used to measure use of a particular Capacity Service (e.g., GB).
- 1.5 "Capacity Value"** means the numerical value assigned to a specific Capacity Service that, when multiplied by the number of Capacity Units of Measure used, results in the Capacity Units consumed.

2. CLOUD SERVICE. The Cloud Service supports customers by providing a data management solution designed for business and IT users. The Cloud Service is a collection of data warehouse cloud services that act as building blocks to support customers in building a data warehouse scenario.

3. FEES. The Usage Metric for the Cloud Service is Capacity Units per Contract Month. Each Capacity Service specified in Attachment A has a corresponding Capacity Unit of Measure and Capacity Unit Value. To calculate the number of Capacity Units consumed through use of a Capacity Service, the total amount of Capacity Units of Measure used during the Contract Month is multiplied by the Capacity Unit Value to arrive at the number of Capacity Units consumed by that Capacity Service. Customer may consume Capacity Units up to the total amount stated in the Order Form for each Contract Month. Unused Capacity Units may not be carried over into any subsequent Contract Month. By way of example, a Capacity Service with a Capacity Unit of Measure in GB of storage for which 300 GB of storage was used Contract Month, with a corresponding Capacity Value of 52, would result in the consumption of 104 Capacity Units.

4. ADDITIONAL TERMS

4.1 SAP Analytics Cloud.

- (a)** Each subscription to the Cloud Service includes the use of five SAP Analytics Cloud for business intelligence Users. Users are individuals authorized to access the Cloud Service.
- (b)** SAP Analytics Cloud has features that collect certain usage information directly from users only for purposes of personalized search results and recommendations, and to help SAP to plan and prioritize features, improve product design, and improve documentation and resources. By default, these features are disabled but will be offered to each user, who upon initial sign-on can choose to opt-in to these features. These features can be turned off at any time by the user, or by the tenant administrator. The tenant administrator settings will affect all users.

4.2 EU Access. The EU Access option is not available for the Cloud Service.

4.3 SAP Data Integration. The Cloud Service shall not access, directly or indirectly, a third-party database(s) licensed under a runtime license from SAP or its Affiliates or any of their respective resellers or distributors, except communication (including data transfers) via application level APIs between the Cloud Service and software applications running on such third- party database.

ATTACHMENT A
To
SAP Data Warehouse Cloud
Supplemental Terms and Conditions

Services	Unit of Measure	Capacity Unit Value (number of CUs)
Compute	64GB Memory and 4 virtual CPU per month	2124.00
Storage	256 GB Solid State Disk Storage per month	52.00
