

**SAP Data Warehouse Cloud  
Supplemental Terms and Conditions**

This Supplement is part of an Agreement for SAP Cloud Services between SAP and Customer and applies only to SAP Data Warehouse Cloud (the “Cloud Service”). Any documents referenced in this Supplement are available upon request.

**1. DEFINITIONS**

- 1.1. “**Contract Month**” means a period starting on the day in a calendar month that is the same numerically corresponding day as the Agreement effective date and ending on the numerically corresponding day in the next calendar month, except that if there is no numerically corresponding day in the calendar month in which that period is to end, that period shall end on the last day in that calendar month.
- 1.2. “**Capacity Services**” means the individual services comprising the Cloud Service identified in Attachment A to the Supplement, as may be updated by SAP from time-to-time with additional Capacity Services.
- 1.3. “**Capacity Units**” means units of consumption that are consumed by the use of any of the Capacity Services.
- 1.4. “**Capacity Units of Measure**” are the types of metrics used to measure use of a particular Capacity Service (e.g., GB).
- 1.5. “**Capacity Value**” means the numerical value assigned to a specific Capacity Service that, when multiplied by the number of Capacity Units of Measure used, results in the Capacity Units consumed.

**2. CLOUD SERVICE**

The Cloud Service supports customers by providing a data management solution designed for business and IT users. The Cloud Service is a collection of data warehouse cloud services that act as building blocks to support customers in building a data warehouse scenario.

**SAP Data Warehouse Cloud, test tenant.** Customer may only use the SAP Data Warehouse Cloud, test tenant for non-productive, development and testing purposes and not for productive transactions or reporting (e.g., Customers may not connect to productive source systems, run production workloads, or allow users to execute production reports). This restriction does not prevent Customer from staging production data in support of a separate production Cloud Service or system.

**3. FEES**

The Usage Metric for the Cloud Service is Capacity Units per Contract Month. Each Capacity Service specified in Attachment A has a corresponding Capacity Unit of Measure and Capacity Unit Value. To calculate the number of Capacity Units consumed through use of a Capacity Service, the total amount of Capacity Units of Measure used during the Contract Month is multiplied by the Capacity Unit Value to arrive at the number of Capacity Units consumed by that Capacity Service. Customer may consume Capacity Units up to the total amount stated in the Order Form for each Contract Month. Unused Capacity Units may not be carried over into any subsequent Contract Month. By way of example, a Capacity Service with a Capacity Unit of Measure in GB of storage for which 300 GB of storage was used Contract Month, with a corresponding Capacity Value of 52, would result in the consumption of 104 Capacity Units.

**4. ADDITIONAL TERMS**

- 4.1. **EU Access.** The EU Access option is not available for the Cloud Service.
- 4.2. **SAP Data Integration.** The Cloud Service shall not access, directly or indirectly, a third-party database(s) licensed under a runtime license from SAP or its Affiliates or any of their respective resellers or distributors, except communication (including data transfers) via application level APIs between the Cloud Service and software applications running on such third- party database.
- 4.3. **On-premise Components.** The Cloud Service includes the optional, limited use of the following on-premise component: SAP Landscape Transformation replication server (“SLT”). Use of SLT is limited solely to loading data into SAP Data Warehouse Cloud and SAP Data Warehouse Cloud, test tenant.

**ATTACHMENT A**  
**To**  
**SAP Data Warehouse Cloud**

<b>Capacity Service</b>	<b>Capacity Unit (CU) of Measure</b>	<b>Capacity Unit Value</b>
Compute	64GB Memory per Contract Month	2124.00
Storage	256GB Solid State Disk Storage per Contract Month*	52.00
Data Lake	5TB of Data Lake Storage (includes Data Lake Compute) per Contract Month	2800.00
BW Bridge*	128 GB of Storage (includes SAP BTP, ABAP environment, runtime and Compute) per Contract Month	1700

**SAP Data Warehouse Cloud, test tenant**

<b>Capacity Service</b>	<b>Capacity Unit (CU) of Measure</b>	<b>Capacity Unit Value</b>
Compute	64GB Memory per Contract Month	2124.00
Storage	128GB Solid State Disk Storage per Contract Month	26.00
BW Bridge*	128 GB of Storage (includes SAP BTP, ABAP environment, runtime and Compute) per Contract Month	1700

\* SAP BTP, ABAP environment, runtime is a cloud-optimized ABAP platform that serves as a development and runtime environment for SAP BW Bridge, utilizing the service framework of SAP Business Technology Platform (BTP). BTP, ABAP environment, runtime may only be used with BW Bridge.

For information on data center availability for the Capacity Services, please visit the SAP Trust Center.
