

**SAP Profitability and Performance Management Cloud  
Supplemental Terms and Conditions**

This Supplement is part of an Agreement for SAP Cloud Services between SAP and Customer and applies only to SAP Profitability and Performance Management Cloud (the "Cloud Service"). Any documents referenced in this Supplement are available upon request.

**1. DEFINITIONS**

**"Contract Month"** means a period starting on the day in a calendar month that is the same numerically corresponding day as the Agreement effective date, and ending on the numerically corresponding day in the next calendar month, except that if there is no numerically corresponding day in the calendar month in which that period is to end, that period shall end on the last day in that calendar month.

**"Capacity Services"** means the individual services comprising the Cloud Service identified in Attachment A to the Supplement, as may be updated by SAP from time-to-time with additional Capacity Services.

**Capacity Unit** is a ratio of services consumed via the Cloud Service and is calculated as set forth in the respective Product Supplement, Service Description Guide or Service Use Description.

**"Capacity Units of Measure"** are the types of metrics used to measure use of a particular Capacity Service (e.g., GB).

**"Capacity Value"** means the numerical value assigned to a specific Capacity Service that, when multiplied by the number of Capacity Units of Measure used, results in the Capacity Units consumed.

**2. CLOUD SERVICE**

The Cloud Service complements SAP's analytical applications with unique functional and technical capabilities as well as numerous sample content packages enabling tailored business scenarios in multiple areas such as finance and sustainability using a no-code/low-code calculation engine optimally prepared for complex requirements and large data volumes.

**3. FEES**

The Usage Metric for the Cloud Service is Capacity Units per Contract Month. Each Capacity Service specified in Attachment A has a corresponding Capacity Unit of Measure and Capacity Unit Value. To calculate the number of Capacity Units consumed through use of a Capacity Service, the total amount of Capacity Units of Measure used during the Contract Month is multiplied by the Capacity Unit Value to arrive at the number of Capacity Units consumed by that Capacity Service. Customer may consume Capacity Units up to the total amount stated in the Order Form for each Contract Month. Capacity Units that are not consumed in a given Contract Month may not be carried over into the next or any subsequent Contract Month.

**4. ADDITIONAL TERMS**

- 4.1. **SAP Data Integration.** The Cloud Service shall not access, directly or indirectly, a third-party database(s) licensed under a runtime license from SAP or its Affiliates or any of their respective resellers or distributors, except communication (including data transfers) via application level APIs between the Cloud Service and software applications running on such third-party database.

**ATTACHMENT A**  
**To**  
**SAP Profitability and Performance Management Cloud**

<b>Capacity Services</b>	<b>Capacity Units (CU) of Measure</b>	<b>Capacity Unit Value</b>
HANA Memory	1 GB per month	18.600
HANA CPU	1 vCPU per month	136.896
HANA Storage	1 GB per month	0.605
Data Lake Compute	1 vCPU-month of IQ Compute (Memory included)	401.016
Data Lake Storage	1 TB per month	202.368
Network Data Transfer	1 GB	0.438

For information on data center availability for the Capacity Services, please visit the SAP Trust Center.
