Key Trends and Impacts in Business and Technology

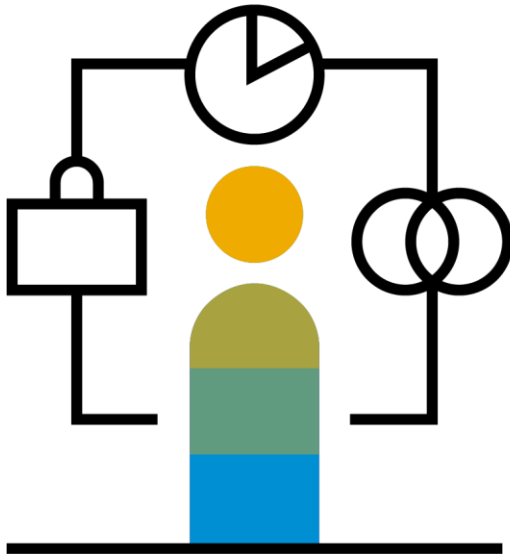

“Application development strategies must evolve to define new approaches to create cloud-optimized, cloud-native, and hybrid applications that deliver maximum value.”¹

1. [“5 Questions to Answer When Building a Cloud Strategy,”](#) Smarter with Gartner, February 28, 2018.

SAP Web IDE

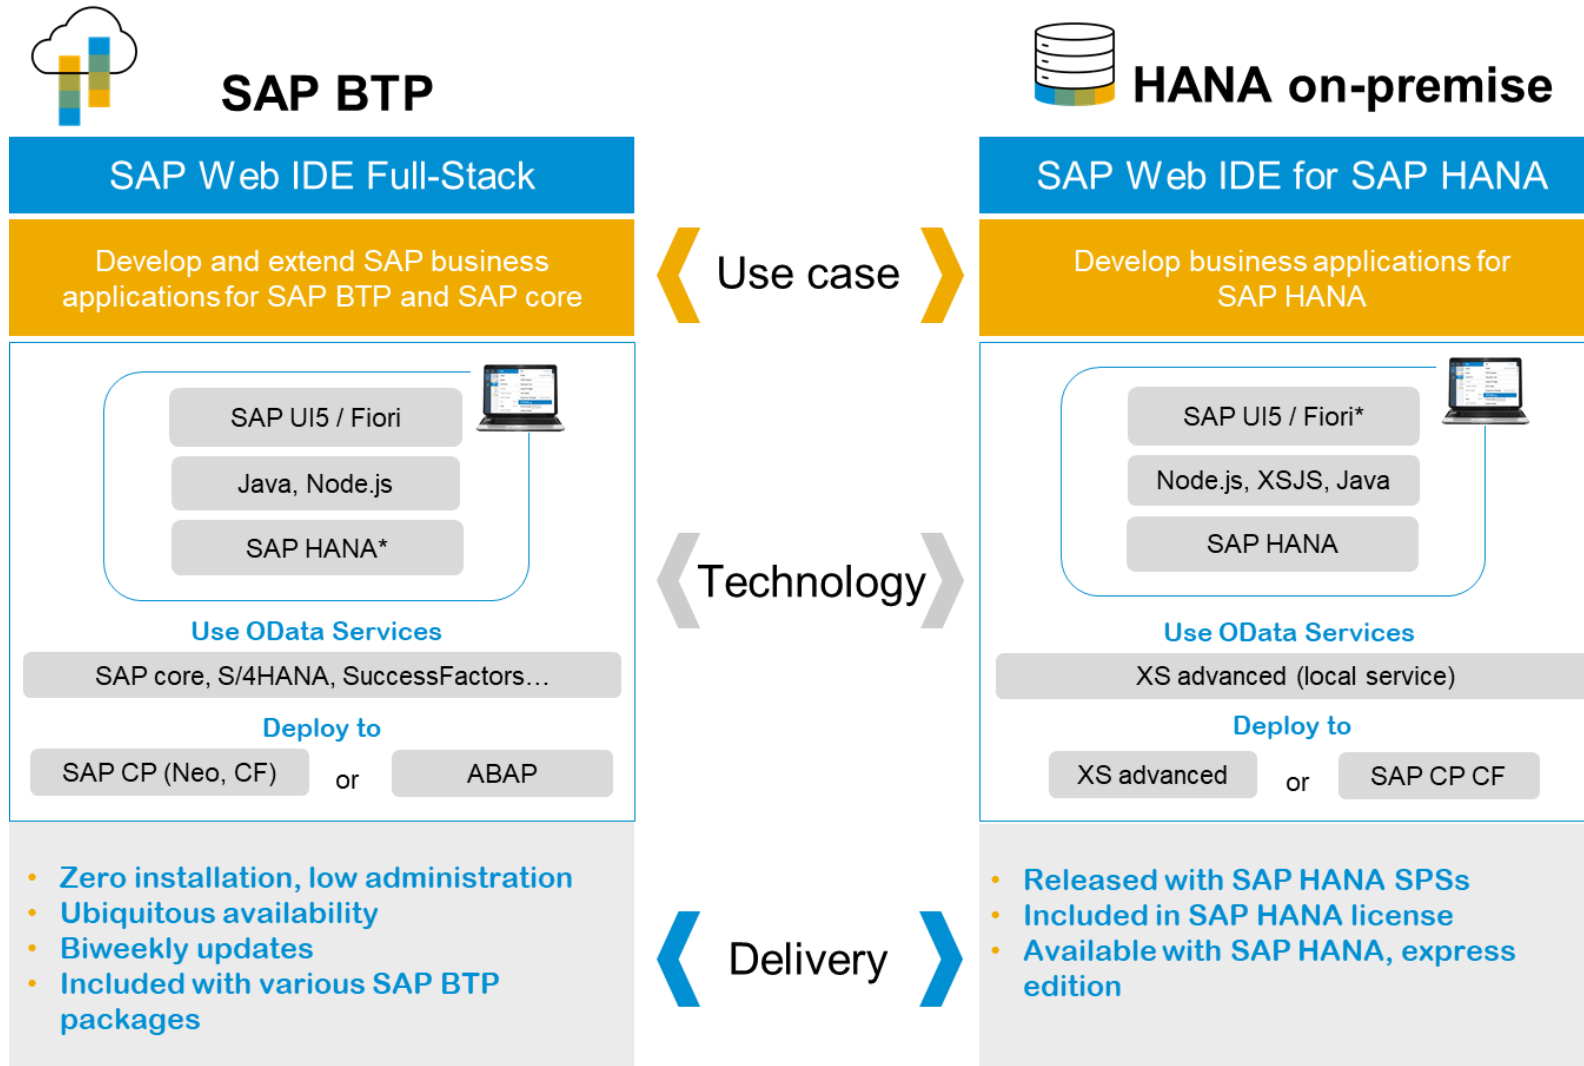

Product Description

SAP Web IDE is a powerful, extensible, **web-based** integrated development tool that simplifies **end-to-end** development of **business applications**

Efficiently develop business applications for **intelligent enterprise** scenarios such as: SAP **S/4HANA** extensions, SAP Fiori, mobile, and Internet of Things (IoT) apps

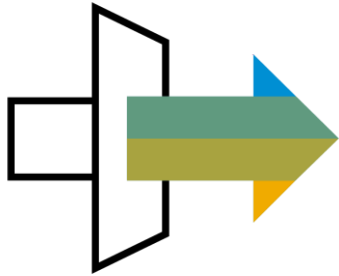

Delivery Options

* Partial support

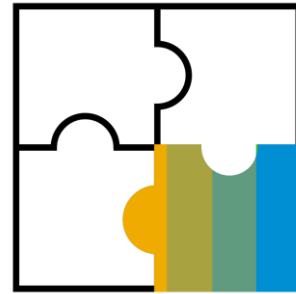

SAP Web IDE

Value Proposition

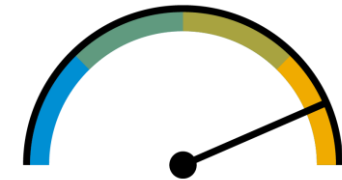

Simple

Available anywhere, anytime, no need for complex infrastructure, reducing cost, complexity, and effort

Integrated

Easily leverage SAP Business Technology Platform (BTP) services to build smarter, more intelligent applications that solve your business problems

Productive

Innovate rapidly on SAP BTP creating or extending business apps, allowing developers to focus on their business domain

SAP Web IDE

Key Use Cases

Refresh User Experience

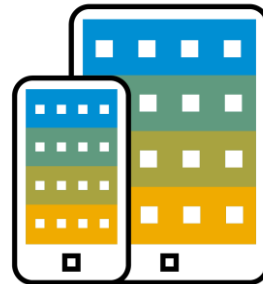

Extend the Digital Core

Model and deploy SAP BPM Workflows

Innovate IoT with SAP Leonardo

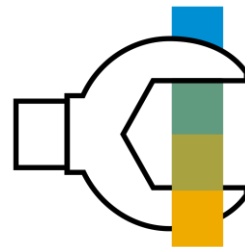

Mobilize your Business

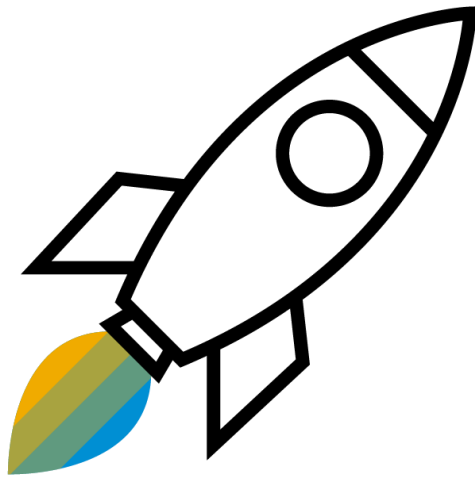

Develop SAP HANA Native applications

Development Process Overview

Design

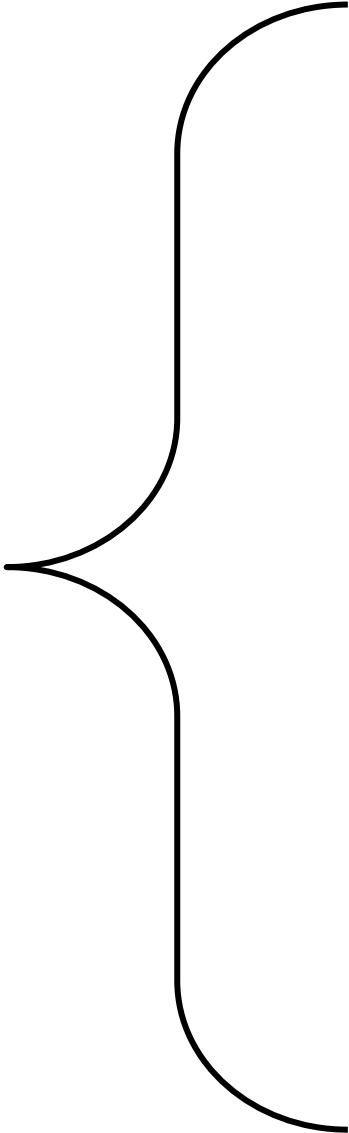

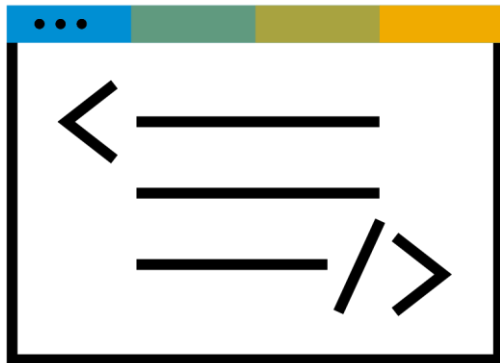

SAP Build

- Jumpstart your designs with one of many prototype examples from the gallery
- Collaboratively develop prototypes with your project team and engage end-users for feedback
- Easily import the Build prototype to SAP Web IDE and use it as a starting point for your SAP Fiori app

Develop

Templates and wizards

Visual/Code Editors

Instant preview with real/mock data

Debugging

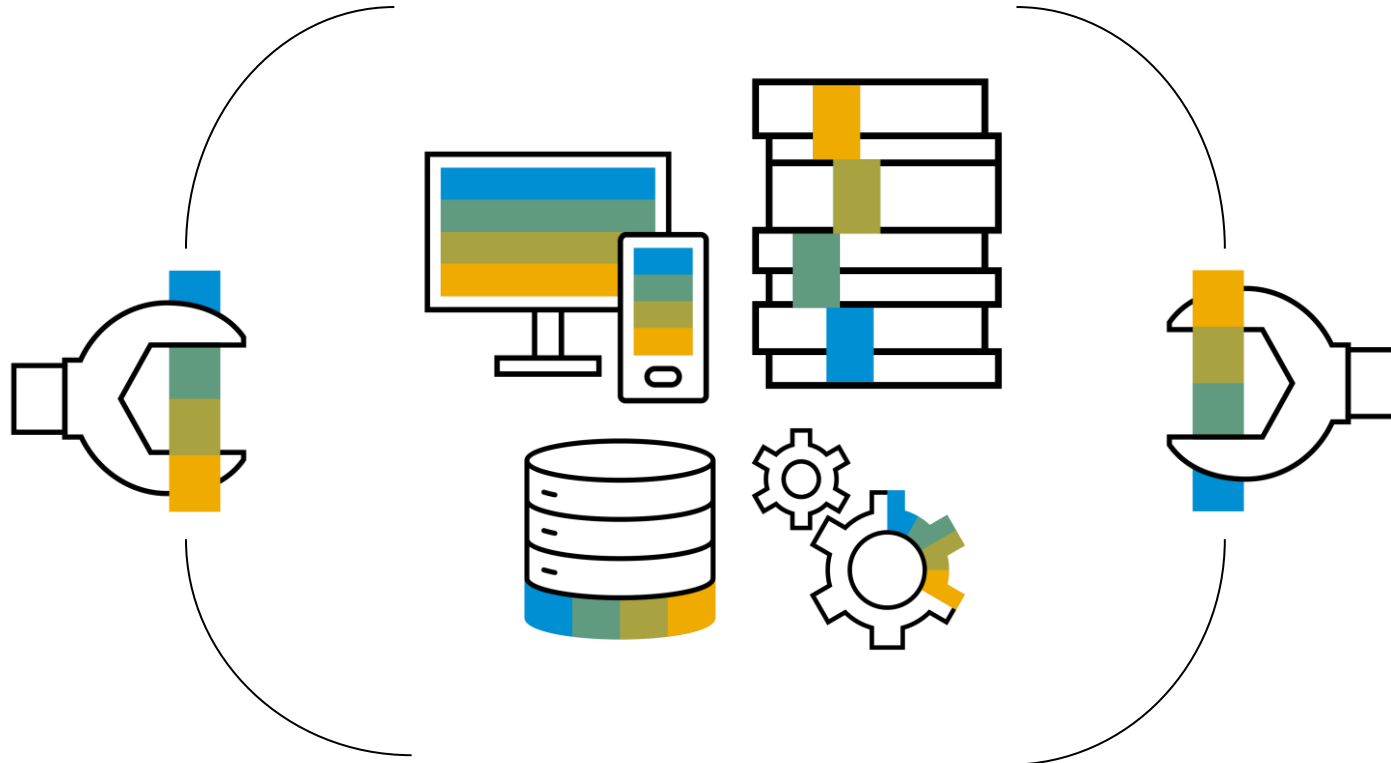

SAP and open source technologies

Source Control Management

Build

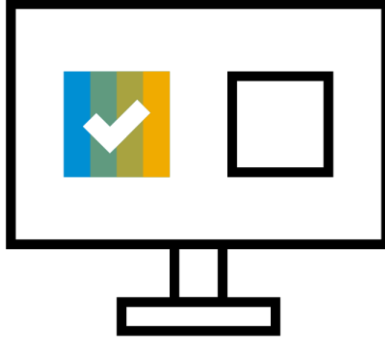

Building UI Applications

Use Grunt open source task runner to build your UI app

Building Business Applications

Build a deployment package from your UI, database, and business-logic modules sharing the same lifecycle

Test

Leverage integrated testing capabilities to validate your applications' functionality and compatibility

Test Authoring

Wizard based and code based assistance for developing unit tests (UI, Java, node.js) and integration tests (UI)

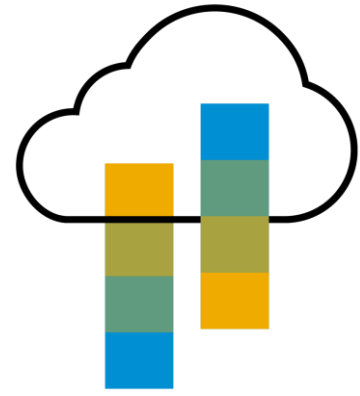

Test Execution

SAP Web IDE empowers developers to test and evaluate their apps functionality during development

Deploy

Multiple options are available for a developer to deploy a new application or update an existing application on the target system and register it to SAP Fiori Launchpad on SAP BTP
