

# Purchasing Monitor

The Purchasing Monitor allows purchasing documents to be analyzed at a strategic and operational level in one tool.

## Business Needs

- Analyzing different purchasing documents is often time-intensive.
- Several analysis tools for different document types
- Very limited aggregation options
- No central document comparison options

## Delivery Approach and Scope

- Central analysis of purchasing documents
- Selections via the selection parameters defined in the standard customization
- Differentiation and aggregation at different levels
- Overview and analysis of purchase requisitions
- Comparison of different documents with different accruals
- Simple maintenance of order confirmations

## Value and Benefits

- Buyers or planners get a simple overview of the purchasing documents relevant to them
- Documents can be aggregated flexibly and differentiated according to business transaction, default key figures, or user-specified key figures
