

SAP ICC Integration Scenario

ABAP Add-On Deployment Certification

PUBLIC

Introduction

- ❑ Third-party ABAP Add-Ons that conform to SAP standards and conventions for ABAP packaging and deployment are eligible for certification within the SAP integration certification program. Certification is possible for SAP Business Suite, SAP NetWeaver and SAP S/4 HANA.
- ❑ All custom ABAP objects, database tables, fields, and data elements must exist within a registered namespace. Software vendors must not modify SAP objects (screens, menus, programs, function modules, etc.) and must not update SAP tables directly.

Benefits of SAP Certified Integration

Opportunity for Growth and Participation

- By supporting market-leading solutions from SAP and offering integrated solutions to its customer base
- May experience faster sales cycles
- Certification serves as proof point for technical alignment with SAP solutions

Increased Potential for Success

- Faster implementations and deployments in SAP solution-based landscapes
- Accelerated ramp-up on SAP knowledge for smaller ISVs

Marketing Benefits

- SAP Interface Certificate and an official “SAP Certified” solution logo:  or 
- Listing in [Online Directory](#)
- Press release review
- Promotion during events, positioning the product as “certified” to SAP customers and consulting partners

Technical Details

Following are the steps to in order to complete ABAP Add-On Deployment Certification:

- Acquire an SAP application developer user license, for Business Suite, NetWeaver or S/4HANA, e.g. through PartnerEdge Build Program.
- Register your unique namespace.
- Develop the ABAP Add-On in your registered namespace.
- Subscribe to the SAP ABAP Service Package granting access to the Add-On Assembly Kit as well as one ABAP certification per year for free.
- Sign an ABAP certification agreement for the Add-On you wish to certify

SAP Developer User License:

A valid SAP Developer User License (Application or NetWeaver) for ABAP development and distribution is required for ABAP Add-On Deployment certification. To develop securely in ABAP, ISVs need to apply for custom namespaces from SAP via SAP Service Marketplace. These namespaces are SAP-exclusive identifiers that enable SAP, SAP customers, and ISVs and partners to develop components and products without the risk of naming collisions. [Namespace registration can be performed online](#) after the purchase of the user license(s).

SAP Add-On Assembly Kit (AAK):

SAP requires that you use the SAP Add-On Assembly Kit (AAK) to package an ABAP Add-On, and strongly recommends that you use the toolkit throughout the development cycle. Syntax and consistency checks for code are done using the AAK. Additional checks are done by SAP consultants during the certification procedure. The AAK tool is available as part of the ABAP Service Package for third-party ABAP solutions.

Test System Recommendation from ICC:

A valid SAP Developer User License (Application or NetWeaver) for ABAP development and distribution is required for ABAP Add-On implementation and certification. It is also recommended to have at least a 2-system-landscape for each Add-On release and each supported SAP release. One Development system (for developing software and documentation, customizing) and one Consolidation system (for translation and delivery).

Certification Price & Validity

Certification Price

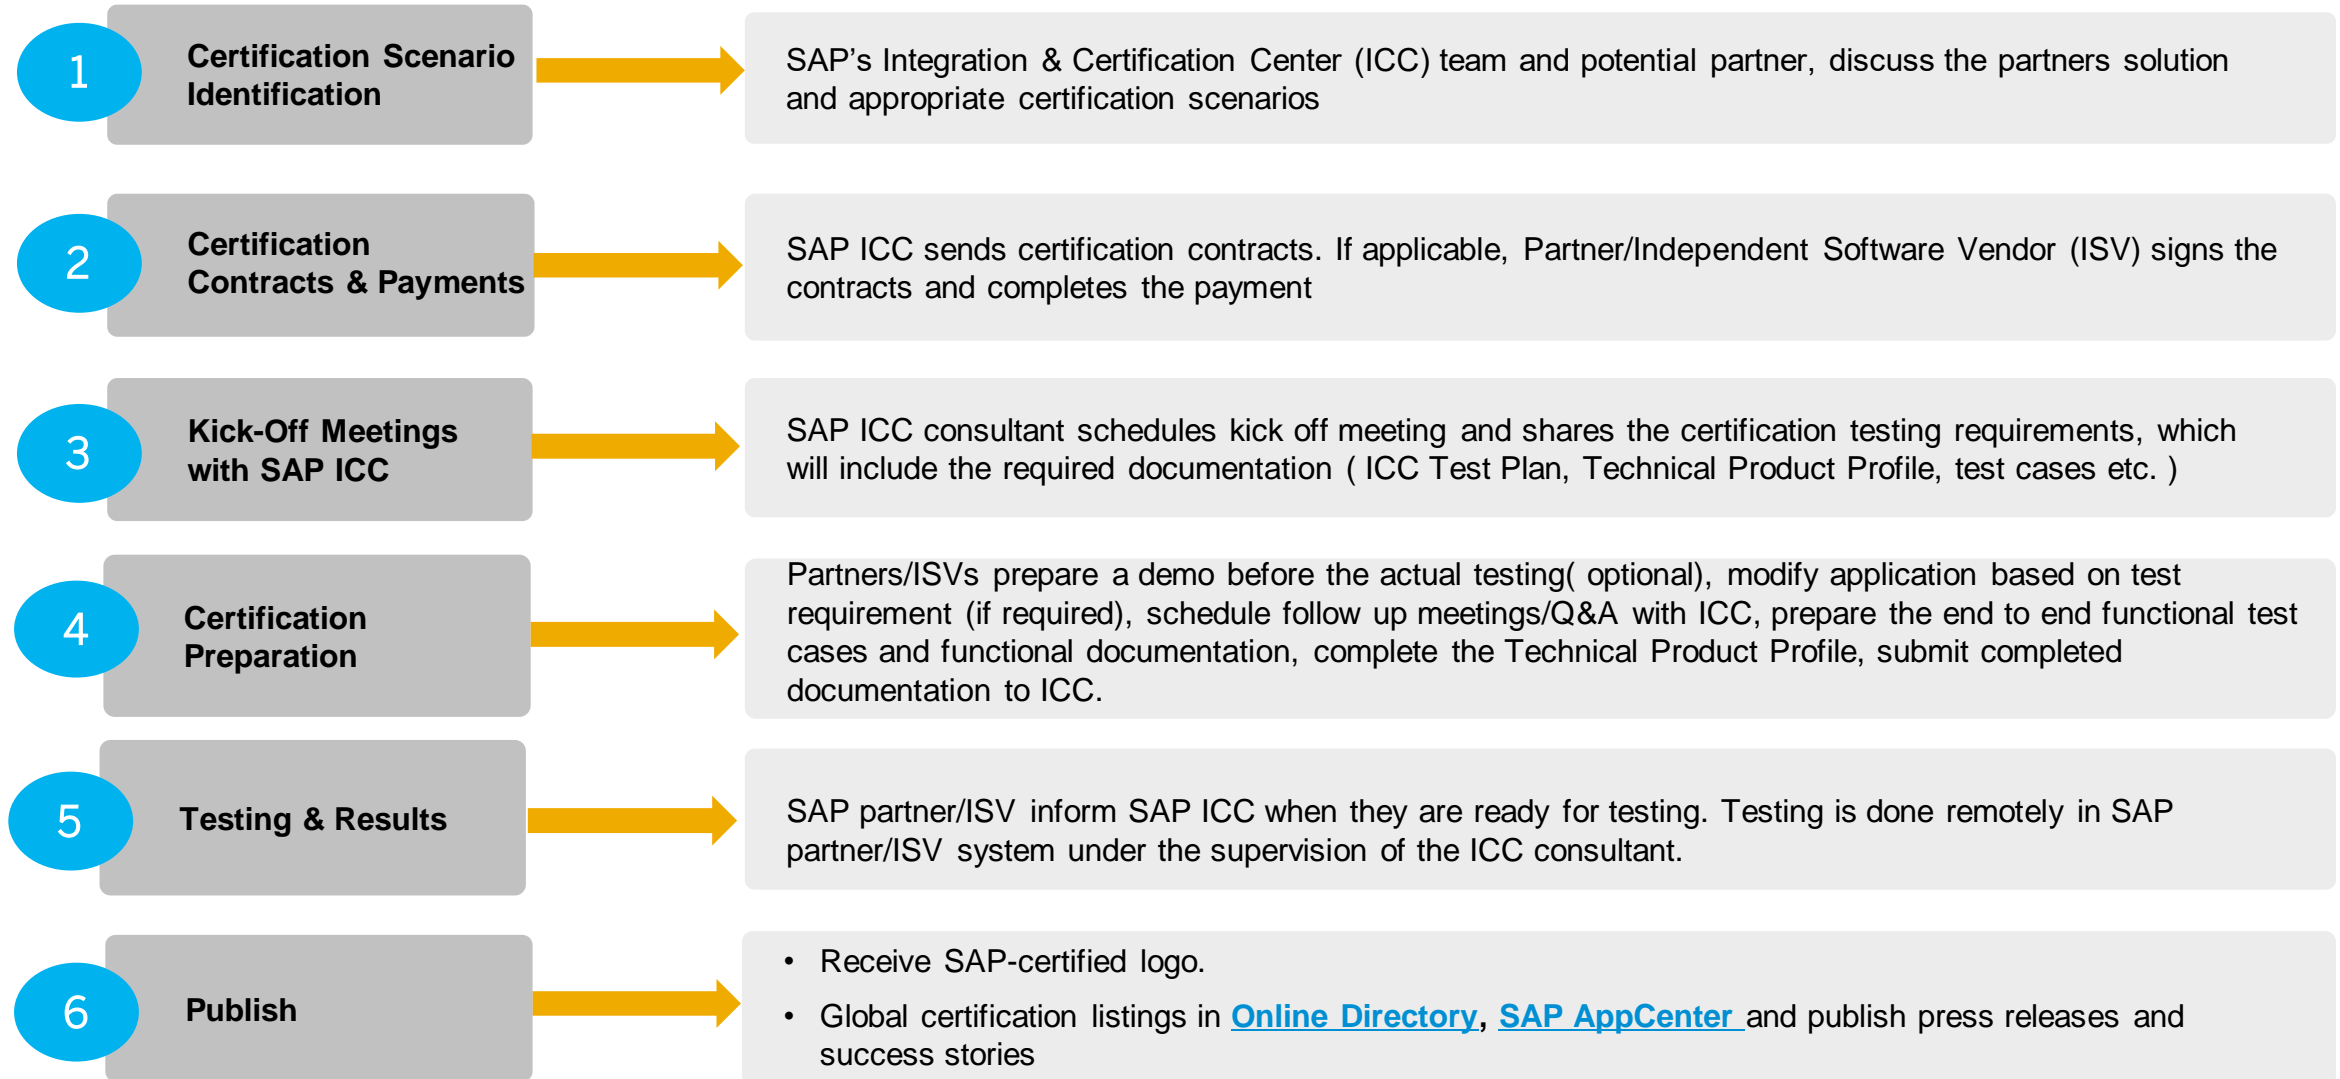

Euro currency is applicable to all countries

Interval	ABAP Service Package Subscription	ABAP Add-On Assembly Kit License	ABAP Add-On Deployment Certification
1st year	15,000 Euro	Included	1st certification per year included in ABAP Service Package; 2nd and more certification 10,000 Euro
All subsequent years	10,000 Euro per year	Updates included as part of ABAP Service Package	1st certification per year included in ABAP Service Package; 2nd and more certification 10,000 Euro

Validity of Certification

Certification for ABAP Add-On Deployment integration scenario is valid for three years
