

SAP ICC Integration Scenario- Add-On Deployment Certification for SAP S/4HANA Cloud, private edition

Introduction

- ❑ Third-party Add-Ons implemented in ABAP, that conform to SAP standards and conventions for ABAP packaging and deployment, are eligible for certification within the SAP integration certification program.
- ❑ Usually certification is performed for the latest compatible SAP product, which is SAP S/4HANA Cloud, private edition. Compatibility with SAP S/4HANA is also mentioned on the certificate.
- ❑ Only on request, or if technical requirements for SAP S/4HANA Cloud, private edition, cannot be fulfilled, certification for SAP S/4HANA or SAP ERP is possible.
- ❑ Technical Requirements include:
 - ❑ Partner must have own ABAP development license (could be purchased e.g. from SAP PartnerEdge)
 - ❑ Add-On solution must be implemented in own registered namespace (e.g. /PROD1/)
 - ❑ Modifications of SAP standard objects not allowed
 - ❑ Only read-access on SAP tables
 - ❑ Using the [SAP Add-On Assembly Kit \(AAK\)](#) to package and distribute your Add-On

Benefits of SAP Certified Integration

Opportunity for Growth and Participation

By supporting market-leading solutions from SAP and offering integrated solutions to its customer base

May experience faster sales cycles

Certification serves as proof point for technical alignment with SAP solutions

Increased Potential for Success

Faster implementations and deployments in SAP solution-based landscapes

Accelerated ramp-up on SAP knowledge for smaller ISVs

Marketing Benefits

SAP Interface Certificate and an official “SAP Certified” solution logo:

SAP Certified
Integration with RISE with SAP S/4HANA Cloud

Listing in [Online Directory](#)

Press release review

Promotion during events, positioning the product as “certified” to SAP customers and consulting partners

Technical Details

Process steps to complete Add-On Deployment Certification for ABAP solutions:

- Acquire an SAP Application Developer User license, e.g. through PartnerEdge Build Program.
- Register your [unique namespace](#).
- Develop the ABAP Add-On in your registered namespace.
- Subscribe to the SAP ABAP Service Package granting access to the Add-On Assembly Kit as well as one certification per year for free.

SAP Add-On Assembly Kit (AAK):

SAP requires that you use the [SAP Add-On Assembly Kit \(AAK\)](#) to package an ABAP Add-On, and strongly recommends that you use the toolkit throughout the development cycle. Syntax and consistency checks for code are done using the AAK. Additional checks are done by SAP consultants during the certification procedure.

The AAK tool is available as part of the ABAP Service Package for third-party ABAP solutions.

Test System Recommendation from ICC:

A valid SAP Developer User License is required for ABAP Add-On implementation and certification. It is also recommended to have at least a 2-system-landscape for each Add-On release and each supported SAP release. One Development system (for developing software and documentation, customizing) and one Consolidation system (for translation and delivery).

Certification Price & Validity

Certification Price, for ABAP Service Package including Add-On Certification

Euro currency is applicable to all
countries

Interval	ServPack subscription fee	License for Add- On Assembly Kit	Add-On solution certification
Initial, 1 st year	15.000 €	included	1 certification per year included, 2 nd and more certification is additional 10k€ each
