Description*

A **product hierarchy** is a way to track and analyze relationships between products, product groups or product classes. The **product hierarchy** stretches from basic needs to particular items that satisfy those needs. We can identify multiple levels of product hierarchy. for example,

- **Need family**
- **Product family**
- **Product class**
- **Product line**
- **Product type**

To elaborate the example further, let's consider **Personal Care**. This is a core need. *Cosmetics, Skin Creams, Shampoos, Conditioners, Soaps,* etc. are part of the **Product Family**. Hair cleaning agents are a **Product Class**. Shampoos are a **Product Line**, or a group of related products. Dandruff control shampoos are a **Product Type**. Clinic All Clear is a **Brand**. A sachet of Clinic All Clear is an example of an *Item*.]
