

SAP ICC Integration Scenario

SAP Commerce Cloud Extension Certification (COMMERCE-CLOUD-EXT 1.0)

PUBLIC

Introduction

- ❑ SAP Commerce Cloud (formerly known as SAP Hybris Commerce) offers a best in class commerce software suite that enables companies to execute all their direct selling processes and present a single view and a unified experience to their customers. Built on the SAP Commerce Platform, it offers a single system for managing product content, commerce operations and channels. Due to the open and extensible architecture of the SAP Commerce Platform, customers are able to easily extend and customize the data model and the business logic to optimally fit their business requirements.
- ❑ In support of promoting a rich and vibrant ecosystem of high quality, robust and tested Commerce extensions, the SAP Integration and Certification Center (SAP ICC) is offering certification for SAP Commerce Cloud Extension Certification. Any third-party extension built for SAP Commerce that conforms to standards and conventions for packaging and deployment are eligible for certification within the SAP integration certification program. SAP highly recommends that payment and tax related solutions complete a code review (SAP Commerce Cloud Certification with Code Quality Review).
- ❑ The Certification of Commerce extensions is available for supported versions of SAP Commerce and verifies mainly the following aspects:
 - Design and Code review (mandatory for Payment and Tax solutions)
 - Packaging of extension
 - Deployment of extension
 - Functional validation

Although the functional scope of the certification covers the complete end to end use case, the technical scope of the certification is limited to the integration between the Commerce platform and the vendor's extension. SAP recommends developing and certifying extensions for the latest release version.

Benefits of SAP Certified Integration

Opportunity for Growth and Participation

By supporting market-leading solutions from SAP and offering integrated solutions to its customer base

May experience faster sales cycles

Certification serves as proof point for technical alignment with SAP solutions

Increased Potential for Success

Faster implementations and deployments in SAP solution-based landscapes

Accelerated ramp-up on SAP knowledge for smaller ISVs

Marketing Benefits

SAP Interface Certificate and an official “*SAP Certified*” solution logo:

SAP[®] Certified
Integration with SAP Customer
Experience Solutions

Listing in [Online Directory](#)

Press release review

Promotion during events, positioning the product as “certified” to SAP customers and consulting partners

Technical Details

- Comprehensive technical documentation related to the SAP Commerce platform is available publicly help.sap.com. For information on the product, please refer to the SAP Commerce website by following the links provided below. Documentation related to certification requirements will be provided to vendors upon sign up.

- **Test System Recommendation from ICC:**

It is required that ISVs have a test system available for certification of each extension release and each supported Commerce release (or typically one test system per certification). Certification tests will be carried-out using the ISV's system landscape. SAP ICC does not offer test systems at the moment as the availability of a test system is considered part of any standard development environment. ISVs may re-use their existing test systems for the purpose of certification.

Certification Price & Validity

Certification Price

Euro currency is applicable to all countries

| Certification | Fee |
|----------------------------------|----------|
| COMMERCE-CLOUD-EXT certification | 5000 EUR |

Validity of Certification

Certification for SAP Commerce Cloud Extension Certification scenario is valid for three (3) years.
