SAP Leonardo Analytics | SAP Analytics Hub

A Single Point of Access to Analytics for Better, Faster Business Decisions

Summary

In the digital economy, business is data driven. To make informed decisions and respond rapidly to changing business conditions, employees need relevant analytics in real time. But for most organizations, analytics lack enterprise-wide penetration. So how can your IT group extend analytics to the widest possible base of business users and deliver the insight needed for better, faster decision making? The SAP® Analytics Hub solution can help.

Objectives

- Speed fact-based decision making to keep pace with rapidly evolving business conditions
- Empower the workforce with actionable insight delivered at the right time and place
- Improve trust in analytics so that users can act with confidence

Solution

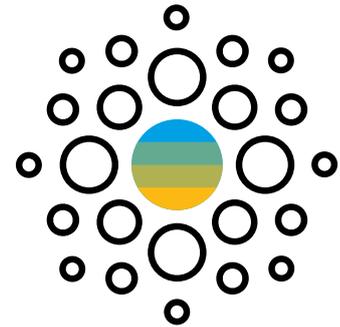

- Simplified access to analytics through a single home page with links to analytics from multiple sources
- IT-enabled community of users to manage the lifecycle of analytics for validation, curation, and certification
- Quick implementation and easy user monitoring to increase adoption

Benefits

- Better business decisions based on accurate, relevant insight into data
- IT control with self-governance structures and tools that empower users
- A single version of the truth and a data-driven culture
- A path to the cloud with flexible hybrid deployment options

Build a Data-Driven Culture with Analytics for All

Smart organizations in the digital economy understand that data is opportunity. The trick is using this data to drive insight – not just for a select few, but for everyone throughout the enterprise. The SAP® Analytics Hub solution gives you the tools you need to make analytics available to all, so that people within your company can make better, faster decisions based on facts.

With SAP Analytics Hub, your IT group can maximize analytics adoption by simplifying access. Users get a single home page with tiles linking to analytics pulled from internal and external sources. Rich descriptions let users identify the right analytic assets they need, with information like data sources, technical and business owners, or how to get authorization to access it. IT, meanwhile, can use an audit trail to review popularity and track adoption rates.

SAP Analytics Hub runs on the SAP Analytics Cloud solution – but the choice is yours to access analytics on premise, in the cloud, or both. Either way, you can get up and running quickly. The solution also helps your IT team govern all analytics. Yet at the same time, it frees IT from mundane tasks by empowering users to access the analytics they need on their own and manage the lifecycle for content curation and validation.

The end result is a data-driven culture. Decisions are made based on a single version of the truth, and users are more aligned with company strategy – which helps your business succeed in a constantly evolving digital economy.
