

Every source. Every category. One unified view.

When direct and indirect, T&E and services/external labor spending come together, finance and procurement leaders across the company get total control of *each* spend category as well as holistic way to orchestrate spending *across* categories. That's Intelligent Spend Management from SAP.

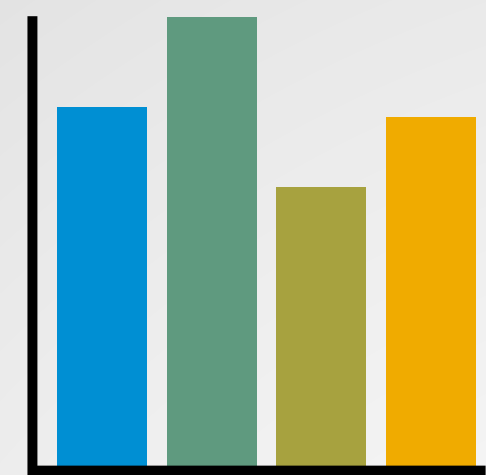

Comprehensive Policy and Supplier Management

Capture spending from inside and outside traditional channels, centralizing once-invisible spend, applying policies consistently and bringing more spend under management.

Best-in-Class Control of Each Category

Put decades of experience, learning and innovation within each category to work, while connecting to unmatched supplier networks and ecosystems of third-party solution providers.

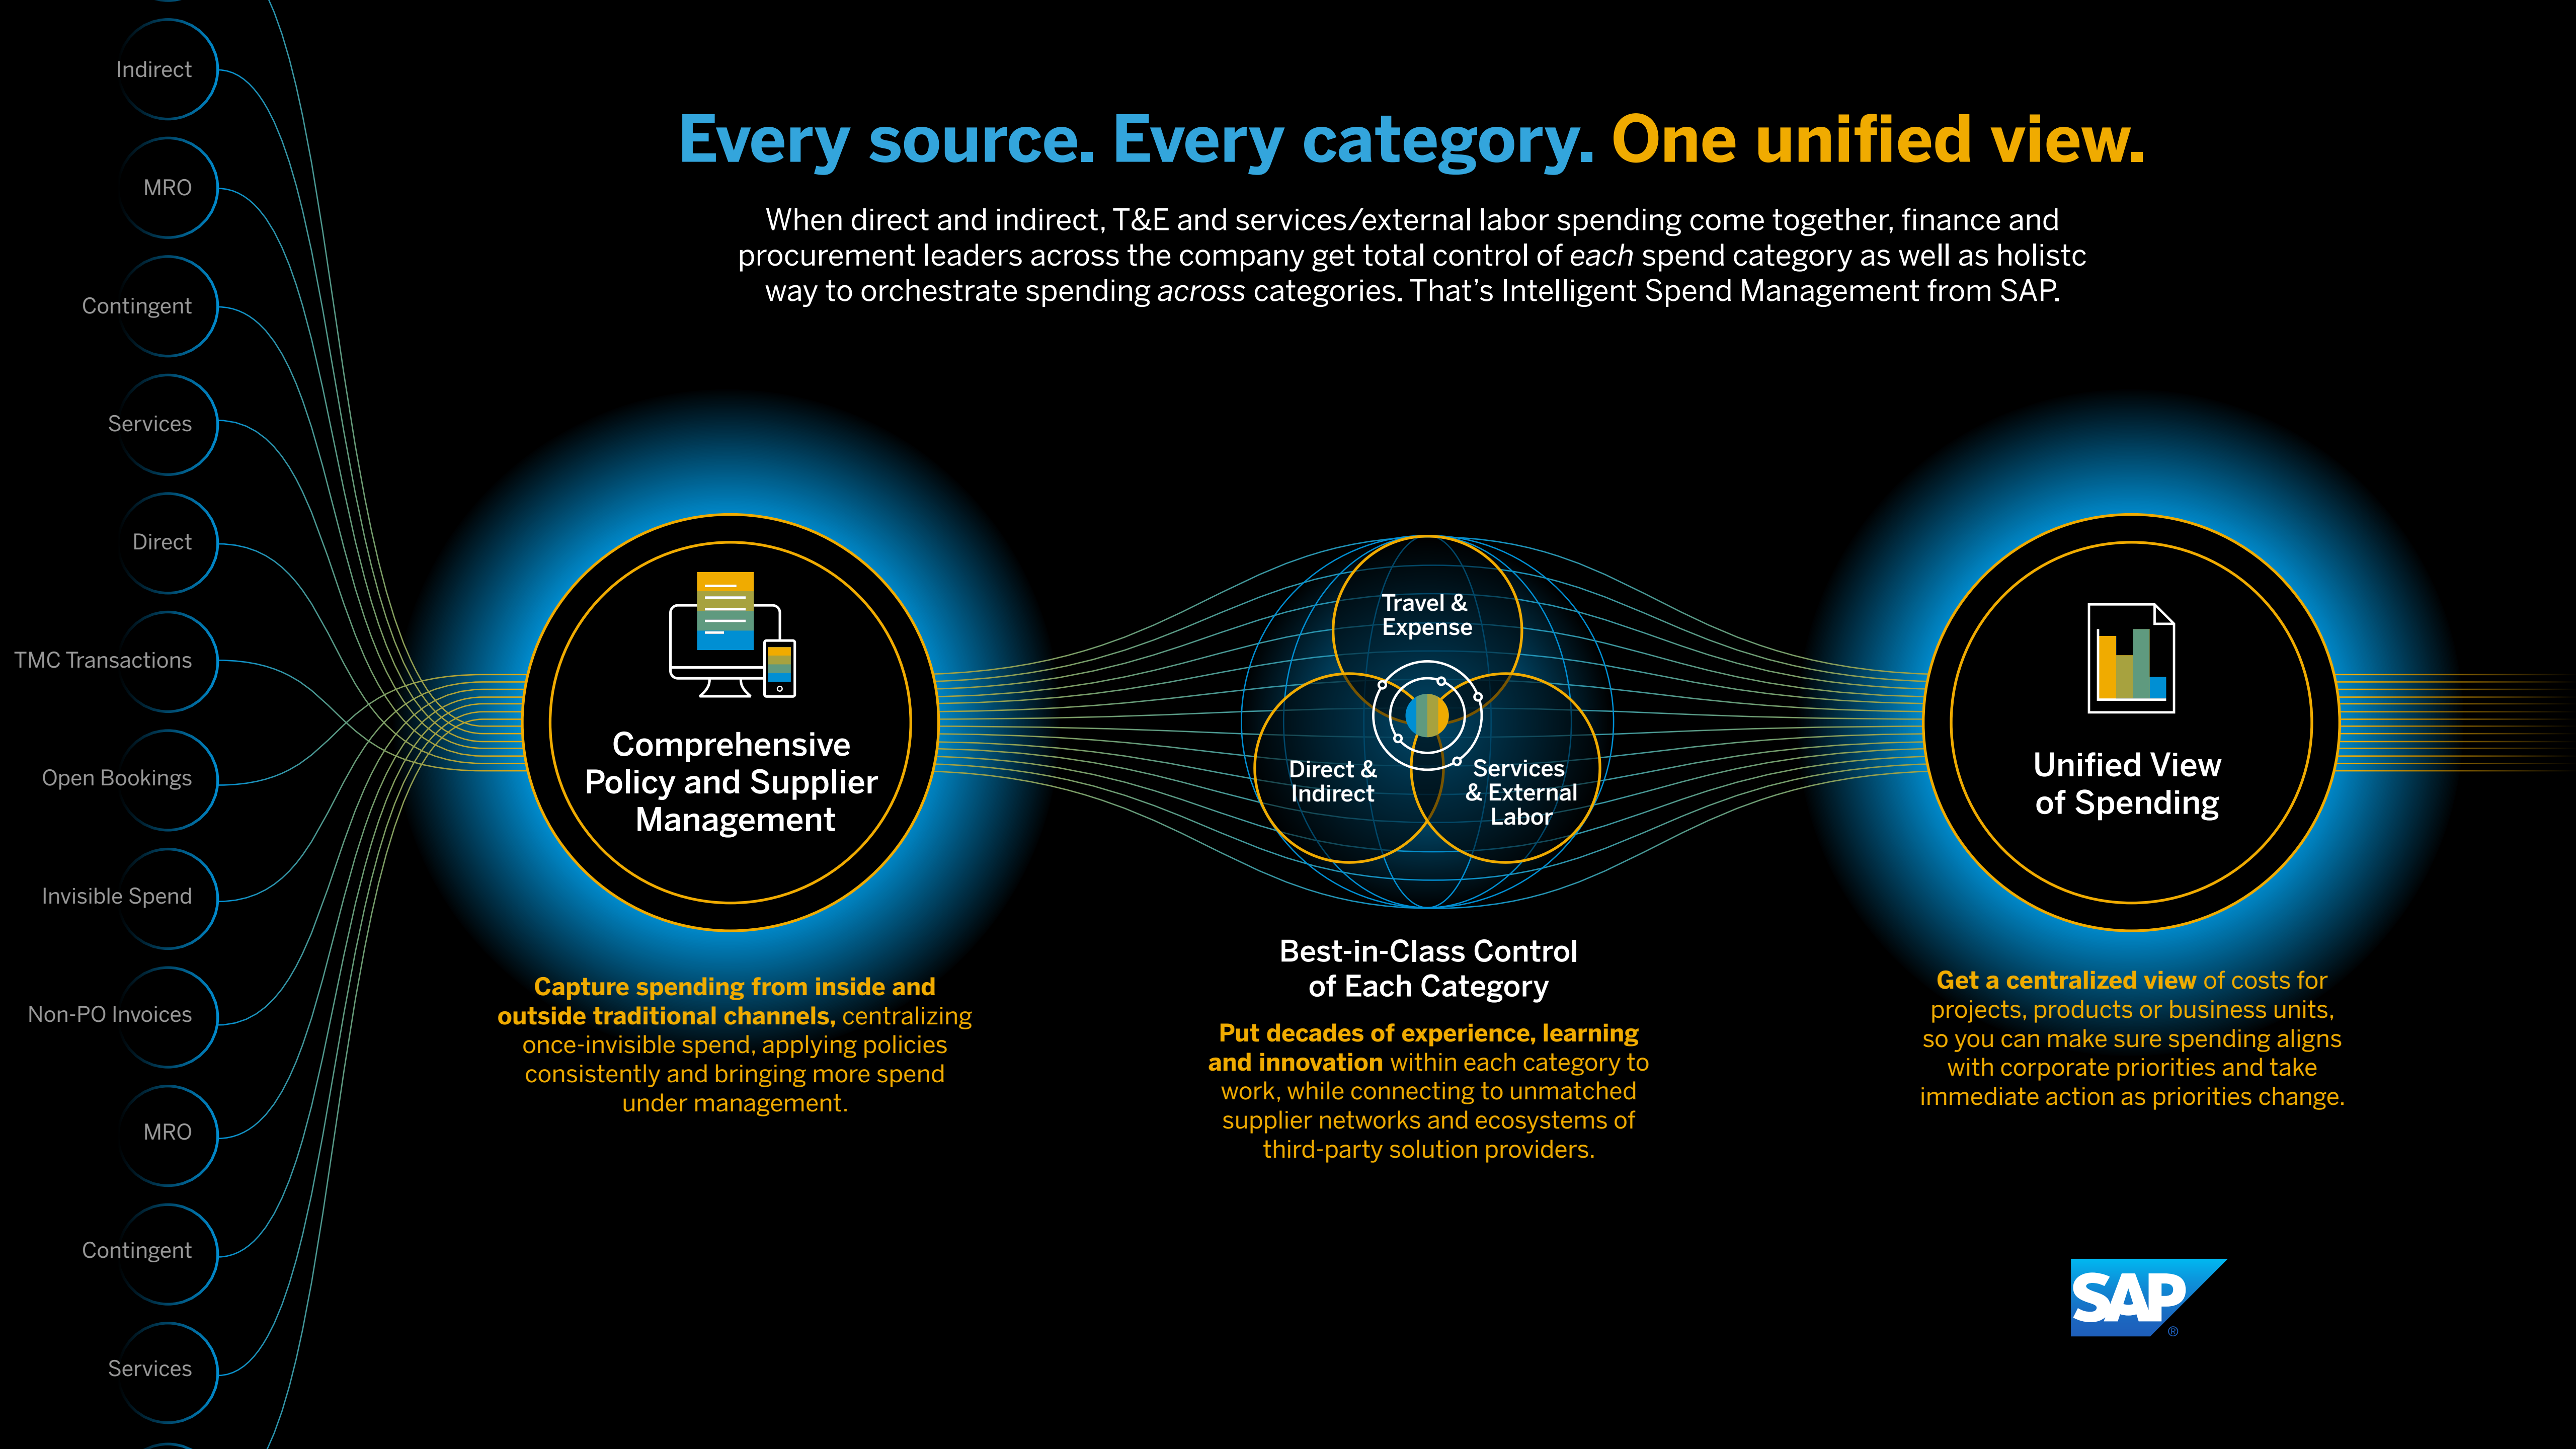

Unified View of Spending

Get a centralized view of costs for projects, products or business units, so you can make sure spending aligns with corporate priorities and take immediate action as priorities change.
