- [6. Community Mission & Badge Roundup](#)
- [7. Tutorials - SAP S/4HANA](#)

### 1. Custom Code Analysis for SAP S/4HANA with SAP Fiori App Custom Code Migration

With SAP S/4HANA 1809, we offer the SAP Fiori Custom Code Migration App based on the remote ABAP Test Cockpit infrastructure. The App should be used for custom code analysis for

SAP S/4HANA in the context of SAP S/4HANA conversion. You'll need an SAP S/4HANA 1809 system set up as a central ATC check system.

## 3. SAP Lumira Designer Composite Collection

One of the key features of Lumira Designer is the ability to create Composites. Composites create reusable components that can speed up large scale dashboard effort for a large organization. In addition, the use of Composites provides the ability for all dashboards in the organization to have a similar look and feel. In this blog post, you'll learn about the "Generic Analysis" Composite. SAP delivers a ready to run Generic template for analyzing data from any SAP BW BEx query.

## 5. Member of the Month – March

Meet March's Member of the Month: [Manoj K](#). Yep, Manoj meets the standard criteria for high activity: He's answered more than 500 questions. But what about community reaction? In terms of answers accepted, he's at about a rate of 25% — a number that might seem low, until you consider that getting people to accept answers and close questions is an ongoing challenge. That's why, in addition to counting accepted answers, we look at the number of upvotes: the community's way of saying, "That's right." Manoj has plenty of those...and no downvotes.
