## TECHNOLOGY

Combine enterprise application software with a flexible, open source platform for breakthrough performance and business agility across your organization. Reduce IT infrastructure complexity with SAP and Red Hat—built-in openness and flexibility modernizes your infrastructure, boosts efficiency, and provides deeper data insights.

*"The Lenovo solution, optimized with Red Hat Enterprise Linux, gave us the performance and scalability we needed, backed by the highest levels of SAP HANA expertise that we saw in the market. ...We've achieved everything we wanted in terms of flexibility, scalability, reliability, and performance."*

### Michael Nevlida

Senior director, Global IT Infrastructure and Support Services, Callaway Golf

## EXPERTISE

Take the complexity out of IT and easily transform your business models.

### WE MAKE HYBRID I.T. SIMPLE

**RED HAT** provides hybrid cloud management with governance and policy-based control, enabling self-service functionalities, chargeback, and more.

**SAP** delivers agile and transformative applications using existing skillsets and the modern design principles of SAP Cloud Platform.

### WE POWER THE INTELLIGENT EDGE

**RED HAT** integrates non-SAP solutions and sources and supports secure edge transport and processing of IoT data.

**SAP** quickly develops, deploys, and manages real-time IoT and machine-to-machine (M2M) applications.

### WE PROVIDE THE NECESSARY EXPERTISE

**RED HAT** streamlines development, modernization, and delivery of SAP extensions with container technology and microservices.

**SAP** delivers an extensive partner development ecosystem as well as mature, industry-related services and knowledge.

### WE MAKE THE DATACENTER EFFICIENT

**RED HAT** automates manual tasks and speeds up deployment and change. Avoids errors and downtime with predictive analytics.

**SAP** continuously strengthens and improves security features to provide information security for on-premise, cloud, and mobile environments.

## WHY RED HAT AND SAP? STRENGTH OF THE PARTNERSHIP

Red Hat is a preferred partner of SAP.

- Red Hat and SAP offer a dedicated, global team and a hardware vendors alliance team.
- Red Hat is a member of the SAP Benchmark Council.
- Red Hat and SAP innovate together on emerging technologies—including Kubernetes, cloud, Internet of Things (IoT), and SAP Data Hub.
- Red Hat Technical Account Managers are trained on SAP solutions.
- Red Hat co-develops with SAP—Red Hat Enterprise Linux, Red Hat Virtualization, Red Hat OpenShift, and Red Hat JBoss® Middleware product teams work together with SAP developers.
- Red Hat Consulting's strategic advisers analyze challenges and help overcome them with comprehensive, cost-effective SAP solutions.

## TECHNOLOGY. EXPERTISE. ASSURANCE.

## STRATEGIC ALLIANCES

### BENEFIT FROM THE RED HAT AND SAP PARTNER ECOSYSTEM

Many of the biggest names in hardware, software, cloud, and business solutions partner with Red Hat and SAP. Working and learning together, we offer innovative technologies and effective customer solutions.

#### Innovate, scale, and reimagine your business with HPE and Red Hat technology

With HPE Mission Critical x86 solutions, you can seamlessly manage your SAP solution from edge to core. HPE Mission Critical x86 platforms running Red Hat Enterprise Linux also allow you to systematically and simply manage cloud deployments of SAP S/4HANA<sup>®</sup>, SAP HANA Analytics, and SAP LEONARDO. This solution also supports IoT data in volumes and levels of diversity that challenge traditional approaches.

#### Expand and accelerate for future growth with IBM and Red Hat

IBM supports SAP HANA Accelerator for SAP ASE with the great performance and reliability of IBM Power<sup>®</sup> Systems, providing native access to SAP HANA's in-memory columnar performance for ASE queries and stored procedures. SAP Sybase Transact-SQL queries and stored procedures are executed unchanged against a real-time replicated copy of ASE data managed in the SAP HANA Accelerator instance.

#### Perform better analysis with Lenovo ThinkSystem optimized with Red Hat

Lenovo's leadership in DataOps provides the performance needed for data sharing and governance in connected landscapes, such as SAP Data Hub. Lenovo's server, storage, and networking building blocks meet key infrastructure requirements, with innovation where it matters most—to reduce cost, improve operational efficiency, protect customer data, and deliver the ultimate performance for critical workloads.

#### Red Hat supports all major hardware platforms and thousands of commercial and custom applications

With SAP, you can adapt and extend core business processes to meet the requirements of the digital economy.

## ASSURANCE

Generate data insights that inform better business decisions and customer experiences. Get ready to face the future and gain tremendous competitive advantage.

*"We decided to kickstart our SAP HANA Tailored Datacenter Integration (TDI) using Red Hat Enterprise Linux and HPE. This forward-thinking and dynamic approach significantly lowered our total cost of ownership and allowed for easier integration of SAP HANA into our datacenter.*

*The whole experience, along with the return on investment we experienced, made it easy for us to decide to move forward with our plans to use SAP Data Hub in Red Hat OpenShift, along with other Red Hat products in our HPE environment."*
