

## SOLVING FINANCIAL OPERATIONS CHALLENGES AND IMPROVING LAW FIRM'S BUSINESS MANAGEMENT

Snap Billing & Finance for legal is configured to deliver standardized processes, commercial discipline, and validation of financial recording for predictable fiscal operations and reduced financial complexity. Snap Billing & Finance for legal provides unparalleled functionality to manage all key aspects of your firm's business and practice management operations including service to cash, financial management, procure to pay, and HR processes.

### >> Finance

Snap Billing & Finance for legal delivers control over firm-wide financial operations, including the controlling, and asset management functions – by supporting critical business processes and by enabling the demands of complex compliance regulations to be met efficiently. It provides management with instant financial insights into key operational metrics allowing for immediate action to be taken. The net result is one set of integrated processes for a single, consolidated version of financial truth across all geographies and in every currency of the firm – all in real time.

### >> Procure-To-Pay

Snap Billing & Finance for legal manages the entire procure to pay process—from procurement of goods or services initiated by Contracts, Purchase Requisitions or Purchase Orders, and Invoice and Payment Processing to fully embedded three-way and two-way matching, ensuring complete accuracy. As part of a complete, digital platform, vendor management has never been easier. Manage on a global or local scale and measure vendor performance and usage through defined reporting and notifications while payments are automatically processed electronically or routed for manual processing as needed.

### >> Human Resources

The most valuable asset in professional services is talent. Snap Billing & Finance for legal includes an HR Mini-Master built natively into the billing and financial system.

This allows not only for the management of the Timekeeper master data, which enables the billing and financial processes but also for full transparency and data cleanliness – from E-Recruitment & Onboarding and Employee & Timekeeper Administration to Benefits Administration and Payroll Processing.

**By moving to a future-ready, enterprise-grade solution, firms can expect to operate as a best-run business.**

- > 20% - 40% reduction in audit cost
- > 40% - 50% reduction in the days to close annual books
- > 5% - 10% decrease in cost of business analysis & reporting
