Get Started with ABAP RESTful Programming Model, Advanced Analytics in SAP HANA 2.0, and Upcoming Community Calls

## In this Issue:

- [1. Getting Started with the ABAP RESTful Programming Model](#)
- [2. Advanced Analytics SAP HANA 2.0 – An Introduction](#)
- [3. SAP Cloud Platform Just Raised Its Profile](#)
- [4. Upcoming SAP Community Calls](#)
- [5. Featured Blog Contributors - September 2019](#)

## 1. Getting Started with the ABAP RESTful Programming Model

The ABAP RESTful Programming Model is generally available in the [SAP Cloud Platform ABAP Environment](#), and now also in SAP S/4HANA starting with the edition 1909. It offers developers an

efficient way to build enterprise-ready, SAP HANA-optimized, OData-based Fiori UI services and Web APIs in the cloud as well as on-premise

## 2. Advanced Analytics SAP HANA 2.0 – An Introduction

Data modeling and analytics is a core feature of the SAP HANA platform as the database combines both relational (OLTP) and analytical (OLAP) processing. Any additional analytical processing capabilities are referenced for this reason as **advanced analytics**. In this blog series you will find quotes, backgrounds, suggested further readings and other information related to [Denys van Kempen](#)'s latest book [SAP HANA 2.0, An Introduction](#) published by SAP Press.
