Agenda

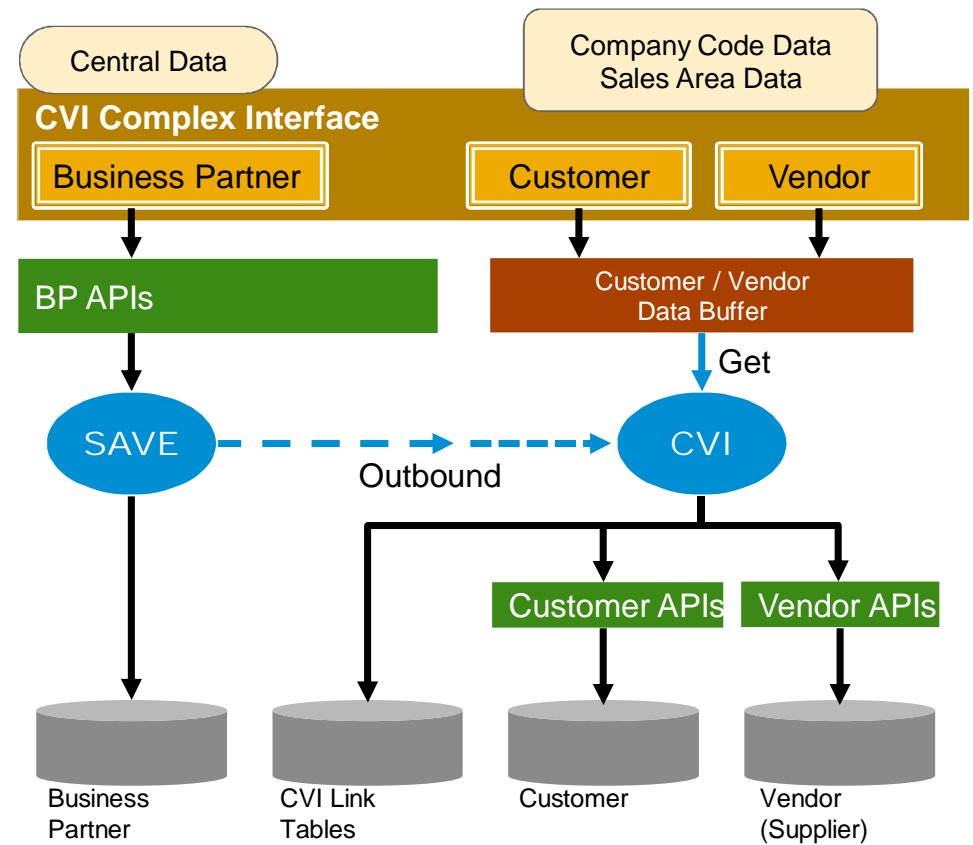

- CVI - Business context
- Delivered Utilities
- BP Synchronization and the new CVI Cockpit
- Demo
- References
- Q&A

Customer & Vendor Integration (CVI)

ECC Customer/Vendor Process

S/4HANA CVI Process

Business Context

- **Problem Statement:** Different steps of the CVI conversion process are either available as standalone reports or NOTES; The steps are not integrated and often customers find end to end conversion as cumbersome
- **Gap:** Lack of a standard, structured and sequenced guidance for Customers and Consultants intending to upgrade to S/4HANA for Business Partner conversion.
- **Solution:**
 - As of **EHP8 SP13**, standard SAP solution for a centralized CVI cockpit that integrates all the steps during a conversion and serves as a guided implementation wizard for conversion is released
 - CVI Cockpit also available for lower ECC releases (NOTE# 2832085)

Delivered Utilities

Delivered

ECC EHP8 SP12 (Q1 2019)

- Master Data Consistency Check Report
 - Enables customer to analyze & fix the issues in the customer / vendor data
- Field checks suppression
 - Enables faster load synchronization by suppressing known inconsistencies in sandbox systems

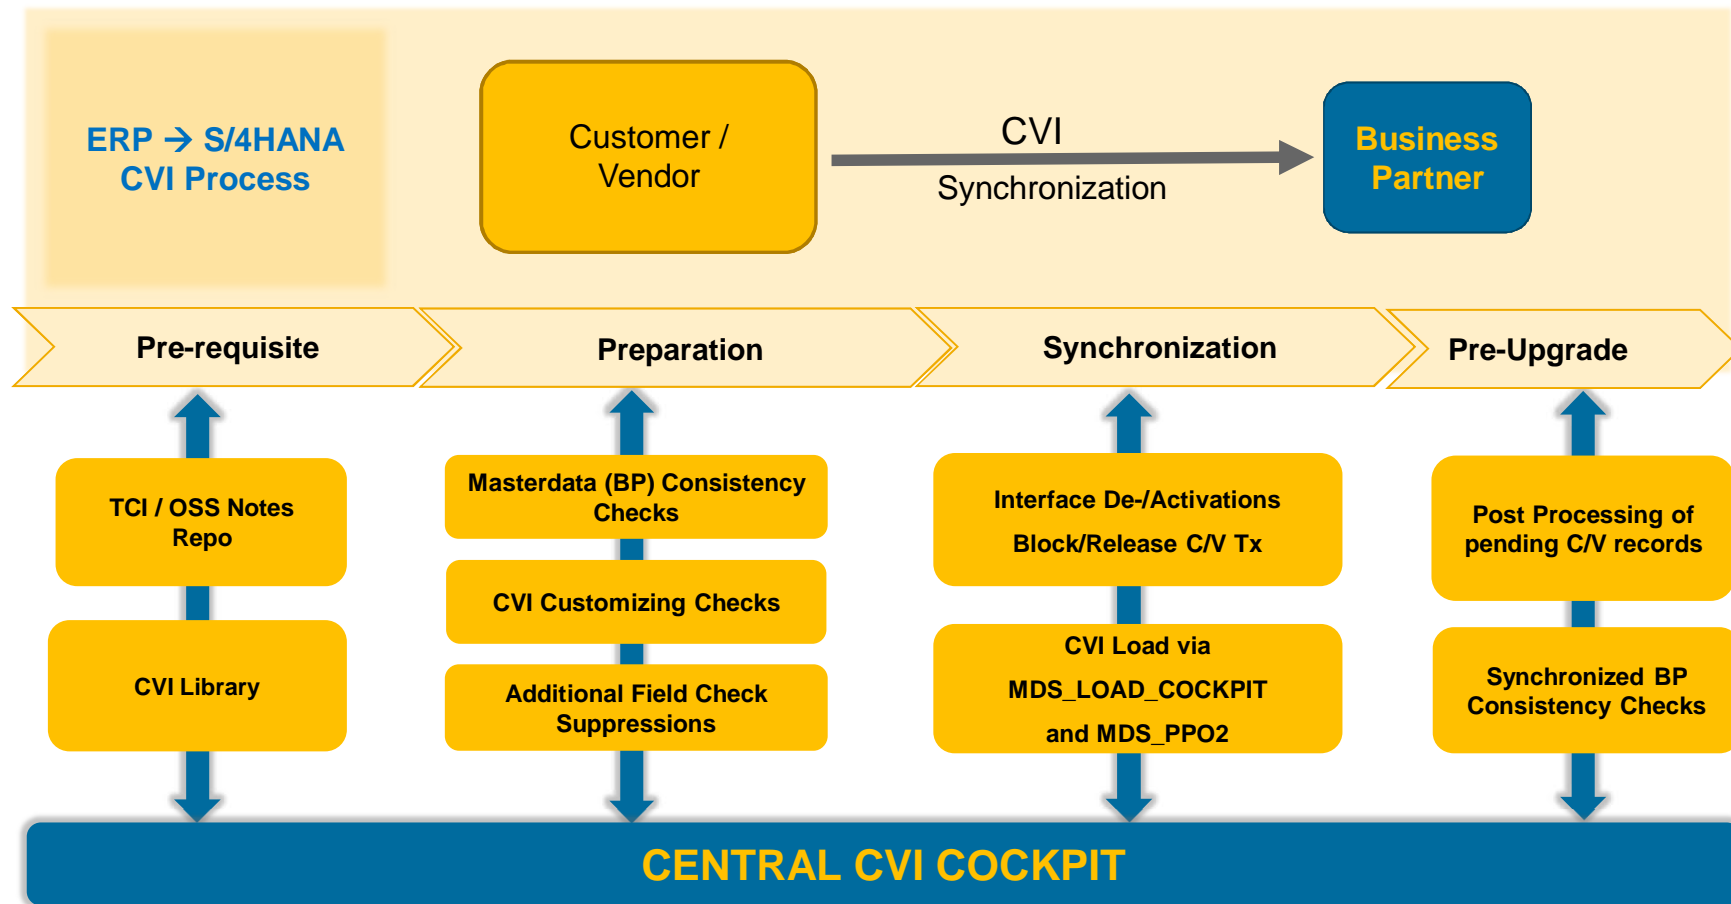

Delivered

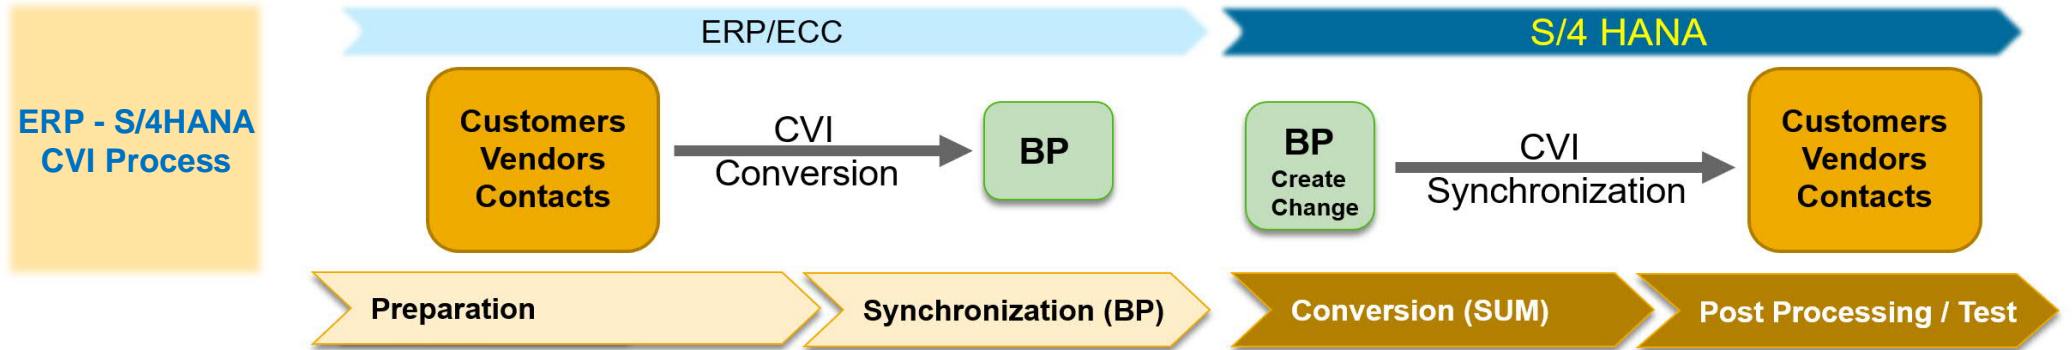

ECC EHP8 SP13 (Q3 2019)

- **CVI Cockpit**
 - Bring the multitude of discrete CVI process components under one standard guided Cockpit
- Collective Notes based on TCI
 - Simplify installation of 100+ notes
- Integration with S/4HANA Readiness check dashboard
 - Get a high-level overview of effort drivers and complexity of conversion
