## 3. SAP S/4HANA Embedded Extended Warehouse Management Overview

SAP EWM provides you with the tools to monitor warehouse activities. With the help of SAP EWM, all the goods movements are controlled by a warehouse management system and provides you the tools to monitor warehouse activities. You can also manage additional functions in the Warehouse like creating a serial number, batch number, vendor management inventory, resource optimization, and value-added services. SAP Extended Warehouse Management allows you to not only monitor the quantity of goods in Warehouse but to manage other critical functions and delivery of goods efficiently.
