

SAP Integration & Certification Center Information Repository

Introduction

This Information Repository provides you links to relevant blogs, presentations, videos and in case you are searching for information about a certain solution or just general information about SAP ICC. If you can't get your questions answered, please contact icc@sap.com

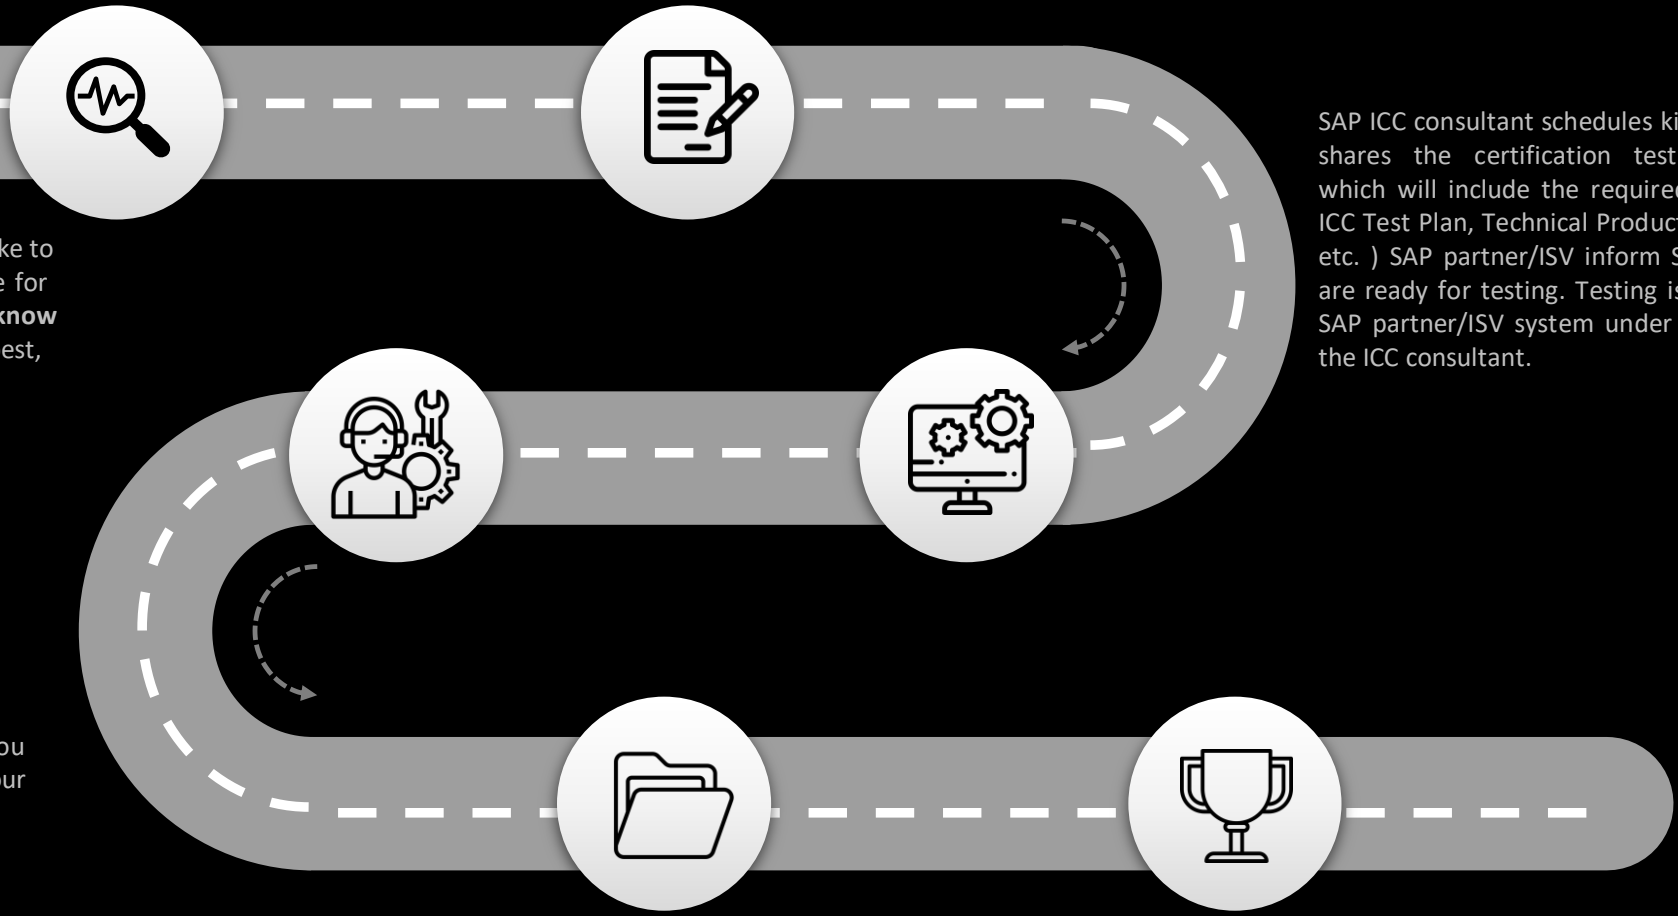

The Certification Path

Once the certification scenario is defined, SAP ICC sends certification contracts. If applicable, Partner/ISV signs the contracts and completes the payment. Contract and invoice are done? Time to move on and complete the process.

If you already **know** which product you would like to certify, get in touch with SAP ICC representative for an official proposal and first steps. If you **don't know** which solution to certify or which scenario fits best, schedule a call with SAP ICC representative.

When your certification process is completed, you will receive all marketing materials for boosting your certified product.

SAP ICC consultant schedules kick off meeting and shares the certification testing requirements, which will include the required documentation (ICC Test Plan, Technical Product Profile, test cases etc.) SAP partner/ISV inform SAP ICC when they are ready for testing. Testing is done remotely in SAP partner/ISV system under the supervision of the ICC consultant.

Have the best results selling your certified product!
