

# The Next Level of SAP Intelligent Robotic Process Automation

Sebastian Schroetel, Head of Intelligent RPA

# SAP Intelligent Robotic Process Automation

accelerates digital transformation of business processes by automatically replicating tedious actions to free up human workers for more high-value tasks

## Improve operations

Mobilize resources for high-value tasks at lower costs

## Increase service quality

Reduce processing times for revenue generating transactions

## Increase compliance

Maintain well-documented audit trails

## Reduce human errors

Automate to gain speed and efficiency

# From BPM & RPA to Hyperautomation

## Current Solutions

- IT-driven initiatives/programs
- Developer-oriented expert tools
- Fragmented solution space and limited integration between BPM, RPA, chatbots etc.
- Lack of intelligence
- Heavy-weight dev, test & deployment processes leading to long time-to-production

## Next Level Process Excellence

- Democratize tool access with low-code/no-code platforms for Citizen Developers
- In-built integration and content for BPM, RPA, chatbots etc.
- Intelligent RPA combining RPA + AI towards advanced decision taking and self-learning bots
- Fast and cost effective implementation/deployment

weeks or months

hours or days

# Hyperautomation with SAP Intelligent RPA

## Accelerate **time-to-value** for automations

- Low-code cloud design studio
- Process Recorder for SAP applications
- Process insights and behavior mining with Spotlight by SAP
- Run-ready process templates, >100 pre-built bots available today

## Infuse AI capabilities to make **automations smarter & more robust**

- Unstructured Document Processing
- Using state of the art computer vision for Surface Automation
- AI-based exception handling

## Run **enterprise-grade** automations at scale

- Integration into SAP Analytics Cloud for complete digital workforce management
- Further monitoring and auto balancing of bots for flexible resource allocation
- Cloud-based runtime for automation of SaaS/web apps

**Design**  
with Studio

**Run with**  
Agents

**SAP**  
**Intelligent**  
**RPA**

**Orchestrate**  
**& Monitor**  
with Cloud Factory
