Master Data Integration and Master Data Management, Trivia Contest 2.0, Consuming REST APIs with Cloud ABAP, and Learning Kyma

Subscribe to SAP Community Voice

Dear Reader,

In this edition, you'll learn the difference between Master Data Management and Master Data Integration as well as getting started with Kyma and Consuming REST APIs with Cloud ABAP.

But be sure to take some time for fun and submit your fun facts in the second round of the SAP Community Trivia Contest!

Regards,

Catherine LaCroix
Editor

Master Data Integration and Master Data Management – What's the Difference?

One domain model and pre-built master data integration belong to the suite qualities that are key for Intelligent Enterprises running on hybrid landscapes. Streamlined master data management adds additional benefit. Read this blog post by SAP's Marcus Ganser to learn about the complementary nature of master data integration and master data management.

Consuming REST APIs with Cloud ABAP

REST APIs are a certain pattern of building APIs. JSON-based REST APIs are prevalent. There is a lot of information on how to provide a REST

Learning Kyma – Follow Along on My Journey

In this blog post (the first in a series), SAP Mentor Alumnus Christian Lechner presents his experience learning and running Kyma SAP Cloud

API from ABAP, but there isn't much on how to consume an external API in ABAP. And from what little there is, they cannot be used with Cloud ABAP.

November 12

How to Transform Integration into an Automated Workflow … and how Customers will benefit from it

One pillar of the Intelligent Enterprise is the smart Integration of all SAP Solutions. In this session we introduce our offering for SAP Solution Owners to significantly improve the customer situation with reasonable effort. Cloud Integration Automation Service is an infrastructure which enables LOBs to describe, model and automate the integration setup and make it centrally available as a cloud service.

Coffee Corner Meet-Up #6

The Coffee Corner is one of the most popular areas of SAP Community, where members can go a bit more off-topic from technology, and in this call series, we're bringing the Coffee Corner live! After a joint welcome, you can expect a breakout-room for a meet and greet with other participants, and other breakout rooms to connect on interesting topics. Make sure to join members old and new for this call and register now! We will be updating you with more information on each upcoming meet-up soon. Learn more.

November 18

Managing the lifecycle of SAP S/4HANA Machine Learning Scenarios

Introducing Intelligent Scenario Lifecycle Management (ISLM) framework that empowers business administrators to perform lifecycle Management operations of machine learning scenarios. ISLM offers harmonized operational experience for embedded ML scenarios (fka PAi Predictive Scenarios) utilizing HANA provided libraries like APL and PAL, as well as side-by-side e.g. deep learning models using SAP Data Intelligence.

Priti Dhingra, Abhishek Mishra

November 24

Introduction to Git-enabled CTS

With git-enabled CTS, there is an option to integrated your ABAP-based development projects with devOps processes. Join this session, if you would like to know what is possible and see how it works.
