

SAFE@WORK

Building Resilient Workplace

The impact of the COVID-19 has been huge on the businesses, industries and the global economy. To plan a smooth and efficient comeback from this pandemic situation, the organization must establish safer workplace practices, social distancing work arrangements and proactive health check monitoring to reduce any spread of the infection / contamination, and hence build a strong business continuity plan.

Business Challenges

- Redesigning of Safety process and Policy
- Health check/monitoring systems & bandwidth
- Resource and Capacity Planning
- Stringent workplace audits/inspections
- Reporting and analysis for better decision making
- Creating Safe and Sustainable Workplace

Proposed Solution Outline

To efficiently manage this comeback, the use of technology and digital solution can enable the organization to scale up faster and manage the impacts with quick turnaround time. YASH with SAP as a Partner, working with the leading EHS managers, industry experts, hands-on functional and technical consultants built an innovative, out of the box, business packaged EHS solution - **Safe@Work**.

Risk Matrix

High	High	Critical	Critical
Low	Med	High	Critical
Low	Low	Med	High
Low	Low	Low	Med
