

# MBIS Springfield S/4 HANA Conversion Methodology

MBIS Springfield is an innovative migration methodology designed to enable companies converting their existing SAP ECC system to S/4HANA by adding new functionalities offered by the new platform, without any disruption to ongoing business processes and historical data.

## Package Scope

- Technical conversion consultancy from ECC to S/4HANA including readiness check, simplification item list correction, Custom code adaptation for HANA database etc.
- Process [re]design consultancy by experienced functional SAP consultants
- 'Additional process' implementations in parallel to technical conversion
- Project management
- Extended project risk management
- Tools and methods developed by MBIS including custom ABAP Code Optimization
- Implementation of selected new functionalities and modules
- Selective Fiori App activations and authorizations
- Cutover and system downtime management
- Data migration & archiving support
- Automatic replacement of obsolete transaction codes in authorization roles
- Go-live and post-implementation support
- Pre- and After- system customizations based on technical conversion requirements
- Functional consultancy to support business and testing process
- Documentation

## Compatibility Considerations

- Compatible systems:
  - SAP ERP 6.0 EHP from 0 to 8
  - SAP Systems with ABAP support
  - Unicode Standard encoding system
- Compatible databases:
  - HANA: SAP ERP 6.0 EHP 7 & 8
  - Other Databases: ERP 6.0 EHP 0 to 8

## Package Benefits

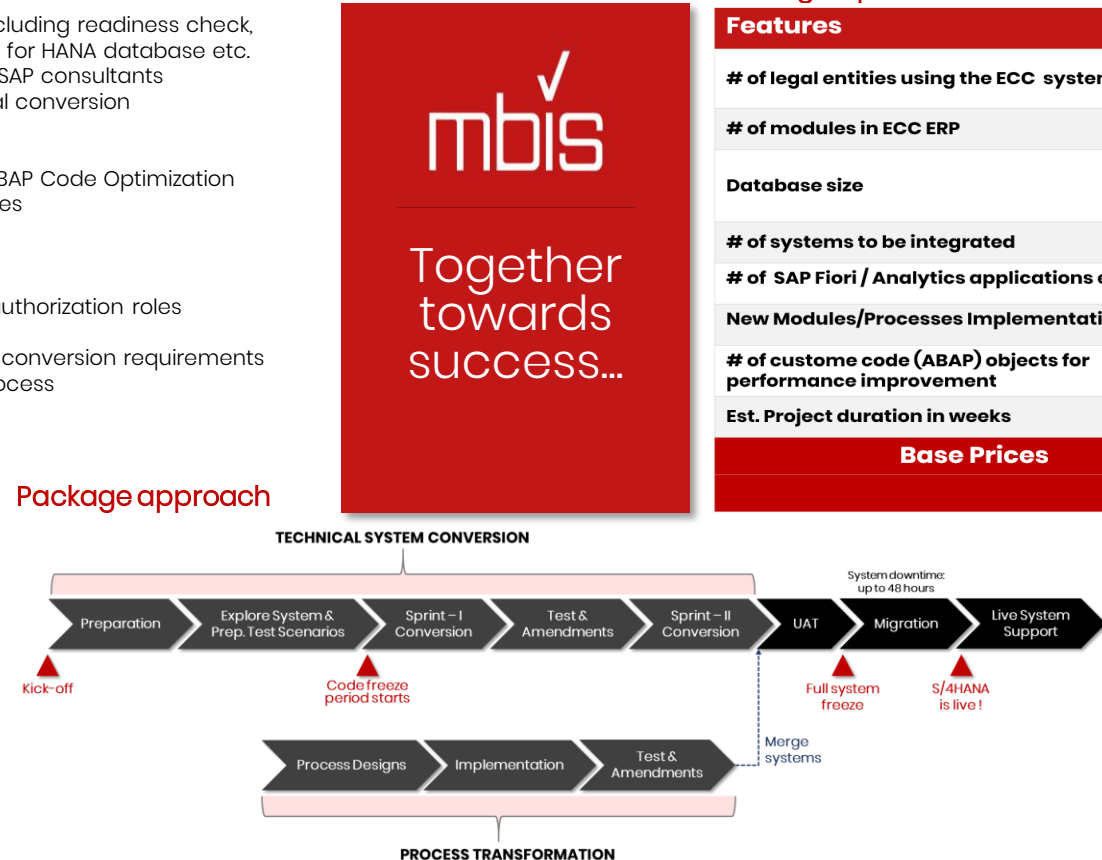

- Technical S/4HANA conversion together with new processes and modules
- Using Fiori screens and embedded analytics starting from day one
- ABAP performance improvements
- Minimum disruption to ongoing business (up to 48 hours)
- Selective historical data migration and archiving
- Opportunity to utilize technical and functional advantages of S/4HANA within weeks through successful proven methodology
- No decision making issues due to lack of like-for-like reporting as historical data is migrated to S/4HANA
- Competitive advantage by early adoption of S/4HANA (through tactical and strategic capabilities)
- Minimum level of business unit participation to the Project cause negligible distraction
- Better TCO and ROI compare to other methodologies
- Relatively short implementation time
