Up to 15% REDUCTION in data management costs

Increase EFFICIENCY across your recruitment teams by 10-15%

Why Edenhouse?

In an industry where HR teams are often small and lean, the amount of time HR can allocate to internal transformation projects is limited. Our Professional Services and HR experts have developed form templates, pre-configured workflow processes, and HR content to help our customers to directly reduce the amount of input required into the overall design of their HR processes and solution content. It also reduces overall project costs by automatically filling gaps in the standard SAP SuccessFactors solution that would otherwise need to be designed and configured from scratch.

Our IP is based on our extensive experience in your industry, and is designed to accelerate the implementation of the solution to deliver a faster impact on the business. We help you win the hearts and not just the minds of your employees. Our commitment is to get you live on time and on budget, and we'll support you in any way we can.
