### Finance & CRM Quick Starter Package

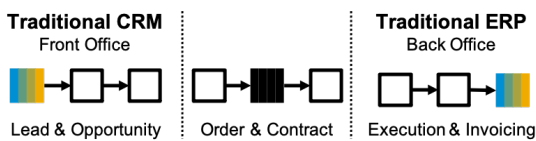

SAP Business ByDesign is a great choice for companies moving to ERP for the first time.

In only five weeks' time you can simplify your day-to-day and have greater visibility to make more informed business decisions.

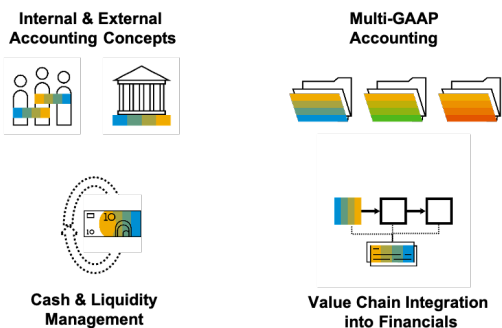

## SAP Business ByDesign - Customer Relationship Management

- SAP Business ByDesign CRM integrates front office and back office into one single solution
- Customer centricity through a complete process from marketing to sales, including order execution and invoicing
- Low-touch integration using open interfaces for web shops, point-of-sales, or invoicing
- Integrate the value chain for cost transparency, up-to-date inventory valuation, and optimized cash-flow
- Built-in pricing, tax, collaboration, planning, and analytics support fast and efficient execution, transparency, and decision making

## SAP Business ByDesign - Financial Management

- Convergence of internal and external accounting concepts
- Parallel valuation capabilities to support multi-GAAP accounting (parallel accounting)
- All operations within your goods and services value chain are linked to financial and management accounting
- New Cash & Liquidity Management Concept
