

FAST EXTENDED WAREHOUSE MANAGEMENT (EWM)

Preconfigured solution enabling industry best practice warehouse processes

SAP® Qualified
Partner-Packaged Solution

delaware

What is FAST EWM

FAST EWM ensures accelerated time to value through application of industry best practice warehouse processes and utilising unique IP developed over 100 implementations, such as remote warehouse modelling and mobile scanning apps. As a result of our expertise, you get ease of end user adoption, accelerated project delivery and reduced hardware, maintenance and training costs.

Our Customers

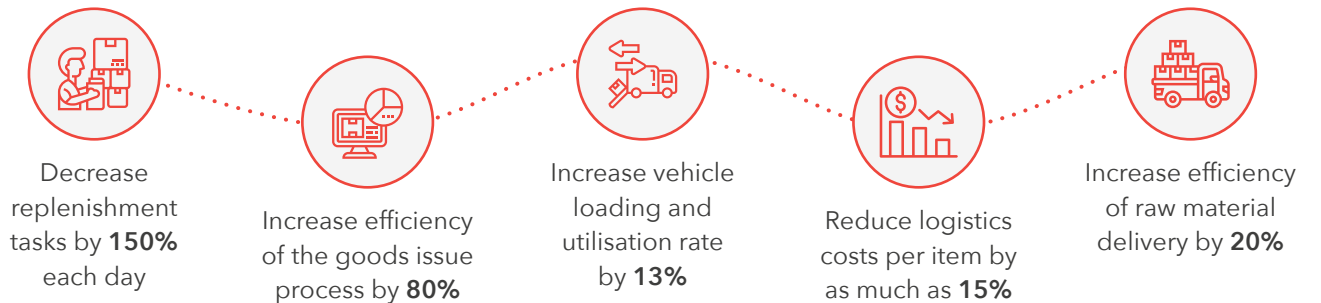

Decrease lead times, increase stock accuracy and improve operator ergonomics

Heavily customised and legacy warehouse systems are preventing operations leaders from adopting industry best practices that would enable business growth, expansion into regulated markets and better customer service.

FAST EWM can resolve these warehousing challenges...

- 1 / Slow picking processes**
You are losing revenue to inefficiency when operators have to switch between systems and stop for manual updates.
- 2 / Inaccurate data**
Ensuring data accuracy for your customers and stock visibility for internal reports is impossible with disparate systems.
- 3 / Loss of new business**
Disconnected systems that require manual input cost you time, resulting in a slow process for new customer setup.

Efficiency gains across your organisation...

ABOUT DELAWARE

Delaware is a full services technology provider, with a particular emphasis on SAP. We provide services from business innovation, through solution design, delivery and sustainment, and pride ourselves on building long-term relationships with market leading organisations across the globe.
