

Cloud Plan for SAP Business One

Unlock the data in your ERP system

How to navigate the new economics realities

Every small and midsize company faces moments of economic highs and lows. But this most recent cycle of change is testing everyone's limits to the point where old norms and rules no longer apply.

According to new research from Oxford Economics, "transforming operations around new technologies and human experiences will be critical to resilience and growth on the years ahead."

Research shows that businesses believe adopting more digital technologies can increase efficiency, improve the customer experience and leads to a more productive workplace

Q. In which of the following ways do you expect automation and digital technologies to support your organization's business goals? (Respondents could select all that apply.)

Increase process efficiency by reducing error, risk and cost

Improve productivity through transformation and intelligent process automation

Improve understanding of the wants and needs of customers, employees and partners

Allow employees to focus on higher-level business tasks

Reports and Dashboards

Allow you to monitor your business performance by displaying historical trends, actionable data, and real-time information.

Dashboards unlock the key data within your ERP and make it readily available to the right business users, when they need it.

Intelligent enterprises differentiate through three key capabilities

Visibility

The ability to collect and connect data that was previously siloed, and recognize unseen patterns

Focus

The ability to simulate the impact of potential options and direct scarce resources to the areas of maximum impact

Agility

The ability to respond faster to changes in the marketplace or the business and pivot business processes toward the right customer outcomes

Cloud Plan for Business One + SAP Analytics Cloud + SAP Business One
