

SAP ICC Integration Scenario- SAP Integration Suite, External Tax Calculation Engines Integration for Brazil (IS-TAX-BR)

PUBLIC

Introduction

- ❑ SAP standard calculation engine does not cover all the specific tax calculation for every country, so this Web application built on SAP Business Technology Platform is an efficient way to simplify the process. The microservices model reduces maintenance, consists on updates pushed automatically, simplifying customers' global landscapes.
- ❑ External solutions from Partners are connected to an iFlow that runs in SAP CPI (Cloud Platform Integration). The customer S/4HANA-based backend communicates with SAP Business Technology Platform.
- ❑ In order to certify that the vendor's API is returning the required information, the payloads structure must be filled correctly. This is tested through the external application Postman – that features API Test Automation. The test will be performed from the certification consultant's end-point, via conference with shared screen.
- ❑ Find more information in the [API Business Hub, SAP S/4HANA Integration with External Tax Calculation Engines](#).
