

# ABeam Cloud® Quick Implementation Package for Learning Management

In today's rapidly-changing business climate, companies need cloud services that optimize human resources management to drive their continued growth. A big part of this growth is related to a company's ability to provide a learning environment for developing employees.

Deploy SuccessFactors® to enjoy the benefits of a world-class HR solution at an affordable cost! ABeam Cloud® Quick Implementation Package for **Learning Management** (hereinafter **AB Cloud® QI-LMS**) provides a Learning Platform to centralize all employee information related to training and create a corporate culture that continuously promotes appropriate learning.

The pre-configured package based on ABeam's experience and recommended best practices for Learning Management. Not only can employees plan their own training on their own initiative, they can also take training assigned to them by their personnel or managers. There is also a training recommendation function among employees, so that employees can take the training with mutual motivation to learn. In addition, the results of training courses are automatically stored in the system so that employees, personnel, and managers can check the status of training courses in real time.

## Our Solution Includes...

### Learning Management:

- Pre-Configured Templates and Data
